Policies and Practice for Storing, Retrieving, Accessing, Retaining, and Disposing of Records in the System:

Storage:

All data stored within the contractor hosting and backup facilities is encrypted utilizing data at rest encryption technologies. A complete data backup is stored on a weekly basis and is then replicated to a physically separate datacenter location and kept for the duration of the retention period.

Paper copies of the scoring for the in-person assessments are maintained in lockable metal file cabinets or in a secured office suite at OPM Headquarters, 1900 E Street NW., Washington, DC and in computerized systems accessible to only those program staff whose official duties necessitate such access. Up until electronic records are migrated to the contractor system, OPM computerized systems adhere to current information technology and security policies and requirements and include confidential passwords for access to these automated records.

Retrievability:

These records are indexed by name of applicants, maiden name (if applicable), graduate schools, State of residence, Social Security Number, professional/graduate/undergraduate degree, veterans' preference, status in PMF Program (e.g., Candidate, Applicant, Eligible, Ineligible, Semi-Finalist, Finalist, Non-Selectee, Fellow, Former Fellow, and Alumni), citizenship, foreign language(s), geographic employment preference(s), skill sets/competencies, and any combination of these.

Safeguards:

Proper safeguards are in place within both the primary and alternate hosting facilities. Each facility leverages security equipment, techniques, and procedures to control, monitor, and record access to the facility, including customer cage areas. Data centers are staffed at all times, i.e., even during the night, on weekends, and on holidays. All perimeter doors have biometric with card access readers. Each door is also equipped with sensors to alert security staff of forced entries and is monitored by closed-circuit television. Records are maintained in a secured space and in computerized systems accessible to only those program staff whose official duties necessitate such access. Confidential passwords are required for access to these automated records. Computerized systems adhere to current information technology and security policies and requirements. All contractor personnel with a need to access data records in this system will undergo a background security investigation prior to being granted access. All of that provider's officials having access to the PMF system will undergo an adjudication, pursuant to the terms of the contract, of their fitness to have access to work of this nature and to assess their fitness to perform this work, based upon an appropriate background investigation. In addition, contractor personnel are required by the terms of the contract to adhere to relevant provisions of the Privacy Act.

Retention and Disposal:

Application files are maintained for a maximum of three (3) years; the automated data base of PMF participant information will be destroyed when no longer needed for administrative purposes.

The PMF Program Office maintains a database system tracking all applicant history and program status from 1997 to the present. All hardcopies are maintained in lockable filing cabinets and are archived in accordance with OPM's Records Management Handbook and records retention schedules.

Media Sanitization and Disposal

The contractor has adopted and implemented policies and procedures to address removal of confidential information including protected data from electronic media before the media are made available for re-use, and final disposition of confidential information including protected data and/or the hardware or media on which it is stored. Destruction is done on-site through specialized services.
