THE GUIDE TO CENTRAL PERSONNEL DATA FILE EDITS
(Update 60, 02/01/11)

OVERVIEW

1. General

The Central Personnel Data File (CPDF) system is an automated information system containing individual records for most Federal civilian employees. The system's principal objective is to provide a readily accessible primary data source for meeting the workforce information needs of the Office of Personnel Management (OPM), other central management agencies, the Congress, the White House, and the public. From data submitted by the agencies, OPM creates a status file and a dynamics file. The status file contains an individual record of the status of each active employee as of the end of the reporting period, usually the end of the fiscal quarters of March, June, September, and December. The dynamics file contains a record of all personnel actions occurring during a particular reporting period, usually the January-March, April-June, July-September, and October-December fiscal quarters.

The Guide shows the status file and dynamics file data edits. The CPDF edits are organized into separate sections -- one for the status file and another for the dynamics file. Edits common to both the status and dynamics files are shown in both the status and dynamics sections of the manual. Within each of these sections, individual field edits are shown before the relationship edits. While individual field edits are executed before the relationship edits, the relationship edits themselves are organized solely for ease of reference in the manual. They may be executed in any order the agency considers efficient.

Generally (unless the name of a data element has changed), the relationship edits are organized in data element name order based on the data element that is considered the subject of the edit. For example, a pay basis/pay plan edit would be shown under pay basis when pay basis is considered the subject of the edit. A pay basis/pay plan edit would be shown under pay plan when pay plan is considered the subject of the edit.

A-2
THE GUIDE TO CENTRAL PERSONNEL DATA FILE EDITS
(Update 60, 02/01/11)

OVERVIEW

The Guide documents how the CPDF system edits agency data. The default shown for an individual field edit or a relationship edit indicates the action taken by the CPDF system when data fail the edit. Usually, the default consists of placing asterisks in the data fields to show that the submitted data are not valid. If data fail an edit in an agency system, the agency should correct the data. **AGENCIES SHOULD NOT SUBMIT ASTERISKS TO THE CPDF.**

Note that the abbreviation **GPDS** refers to The Guide to Personnel Data Standards, which is available at Internet address <http://www.opm.gov/feddata/guidance.asp>. The abbreviation **GPPA** refers to The Guide to Processing Personnel Actions, which is available at Internet address <http://www.opm.gov/feddata/persdoc.asp>.

We add, revise, and delete CPDF edits throughout the year to reflect changes in human resource programs. Whenever possible, we issue the new editing requirements in advance of their effective dates to give agencies ample time to revise their systems. We issue these revisions as Changes in the Unincorporated Changes section of this manual's Appendix. The effective date is at the beginning of each Change listed in the Appendix. Readers should always check the Unincorporated Changes section of the Appendix for any revisions in edit requirements that have occurred since the last Update.

We issue complete revisions of this manual as Updates. When we issue an Update, we incorporate all of the editing requirements effective as of the date of the Update. This date is shown at the top of each page. We list all the revisions in the Incorporated Changes section of this manual's Appendix. Thus, any change in the body of the manual from one Update to the next is listed in the Incorporated Changes section.

OVERVIEW

2. Edit Number

Each edit is assigned a six-position CPDF edit number, which is used on CPDF error listings. The edit number consists of three components: (1) a three-digit edit prefix in positions 1 through 3 that identifies the data element that is the subject of the edit, (2) a two-digit number in positions 4 through 5 that (in conjunction with the two other components) uniquely identifies the data element edit (with the numbers 00 and 01 reserved for individual field edits, as distinguished from relationship edits), and (3) a one-digit edit suffix in position 6 that identifies the edit as pertaining to the status file (number 1), to the dynamics file (number 2), or to both the status and dynamics files (number 3). Examples are shown below.

EDIT NUMBER	EXPLANATION
xxx.00.1	Indicates an individual field edit that only pertains to the status file.
xxx.00.2	Indicates an individual field edit that only pertains to the dynamics file.
xxx.00.3	Indicates an individual field edit that pertains to both the status file and the dynamics file.
xxx.05.1	Indicates a relationship edit that only pertains to the status file.
xxx.05.2	Indicates a relationship edit that only pertains to the dynamics file.
xxx.05.3	Indicates a relationship edit that pertains to both the status file and the dynamics file.

OVERVIEW

3. Edit Prefix

The edit prefix, which occupies positions 1 through 3 of the six-position CPDF edit number, identifies the data element that is the subject of the edit (as shown below). The [status file individual field edits](#) start on page B-1. The [status file relationship edits](#) start on page B-7. The [dynamics file individual field edits](#) start on page C-1. The [dynamics file relationship edits](#) start on page C-8. Using Adobe Acrobat to view the Guide, click on "SR" (appearing after the data element name) to go to the status file relationship edits for the data element. Click on "DR" (appearing after the data element name) to go to the dynamics file relationship edits for the data element.

Notes:

- 1 Spaces are valid for this data element except for the March and September submissions.
- 2 If the first two positions of the submitted duty station are alphabetic, zeros are inserted in the last three positions regardless of the submitted values. Note that spaces are not acceptable for a duty station on Status submissions, although spaces are acceptable for a duty station on Dynamics submissions.
- 3 Spaces are valid for this data element: (a) if agency/subelement is AFNG, AFZG, or ARNG or (b) if agency/subelement is CM63 and current appointment authority (1) is XZM.
- 4 Core based statistical area (CBSA), combined statistical area (CSA), and locality pay area (three data elements generated by OPM from duty station and not submitted by agencies) also have asterisks inserted.
- 5 Asterisks are inserted in nonblank entries for locality adjustment, retention allowance, and supervisory differential.
- 6 If the first position of SSN is 8 or 9, then positions 2 through 5 of SSN must match an entry in the CPDF personnel office identifier file or be asterisks.

OR

If the first position of SSN is other than 8 or 9, then positions 1 through 3 of the SSN must be greater than 000 and less than 800.

Default: Reject record.

Notes (continued):

7 If any of the ethnicity and race identification positions is other than space,
Then each of the ethnicity and race identification positions must be 0 or 1,
And at least one of the ethnicity and race identification positions must be 1.

Default: Insert asterisk in each of the ethnicity and race identification positions.

8 If occupation is 0334, then 2210 is moved to occupation.

9 If pay plan is GL,
And grade is equal to or greater than 11,
Then pay plan must be GS.

Default: Move GS to pay plan. Failing the edit does not cause the record or data element to be counted as an error, but agency should submit GS for the data element.

10 If rating of record (level) is Z, rating of record (level) is moved to rating of record (pattern) and space is moved to rating of record (level).

652 (LOCALITY ADJUSTMENT)

Note:

Due to reporting requirement changes, the Locality Adjustment field may contain (depending on the pay rate determinant) a locality adjustment or a special rate supplement.

Table 25 shows locality pay percentages currently authorized for each locality pay area. We divide the locality adjustment amount by the basic pay amount to calculate the percentage used in these edits. We generate the locality pay area code from the duty station. The locality pay area codes are defined in The Guide to Personnel Data Standards, available on the Internet at <http://www.opm.gov/feddata/guidance.asp>.

652.10.1 If pay plan is FO, FP, GG, GH, GL, GM, or GS,
 And pay rate determinant is 0 or 7,
 And locality pay area is other than AK, HI, ON, ZZ or asterisks,
 Then the amount of the locality adjustment, as a percentage of basic pay, must
 match the percentage for the locality pay area on Table 25, be asterisks or basic
 pay plus locality adjustment must equal the EX-04 rate on Table 5.

Default: Insert asterisks in locality adjustment.

652.15.1 If pay plan is GG, GH, GM, or GS,
 And pay rate determinant is 5, 6, E, or F,
 And special pay table identifier is other than 0491,
 Then the special rate supplement must be greater than zero.

Default: Accept data as submitted. Failing the edit does not cause the record or data element to be counted as an error.

Note: The default action in this edit is temporary to allow agencies time to modify special rate documentation in their HR systems. Eventually, the edit will be changed to insert asterisks in locality adjustment.

470 (RATING OF RECORD (LEVEL))

NOTE: If Z appears in rating of record (level) on input, it will have been moved to rating of record (pattern) and replaced by a space. That is the only circumstance under which rating of record (level) would contain a space at the performance of these edits.

470.02.2 If nature of action is other than 001 or 817,
AND rating of record (pattern) is not equal to Z,
Then rating of record (level) may not be space.

Default: Insert asterisks in rating of record (level), rating of record (pattern), and rating of record (period).

470.03.3 If rating of record (pattern) is A,
Then rating of record (level) must be 1, 3, or X.

Default: Insert asterisks in rating of record (level) and rating of record (pattern).

470.04.3 If rating of record (pattern) is B,
Then rating of record (level) must be 1, 3, 5, or X.

Default: Insert asterisks in rating of record (level) and rating of record (pattern).

470.05.3 If rating of record (pattern) is C,
Then rating of record (level) must be 1, 3, 4, or X.

Default: Insert asterisks in rating of record (level) and rating of record (pattern).

470.06.3 If rating of record (pattern) is D,
Then rating of record (level) must be 1, 2, 3, or X.

Default: Insert asterisks in rating of record (level) and rating of record (pattern).

472.02.2 If rating of record (period) is not spaces or asterisks,
Then it must be equal to or less than the effective date of personnel action.

Default: Insert asterisks in rating of record (period).

472.04.2 If rating of record (period) is not spaces or asterisks,
Then it must not be more than 5 years earlier than the effective date of personnel
action.

Default: Retain data as submitted. Failing the edit does not cause the record or
data element to be counted as an error, but agency should verify that the rating of
record (period) reflects the date of the employee's most current rating of record
(level).

652 (LOCALITY ADJUSTMENT)

Note:

Due to reporting requirement changes, the Locality Adjustment field may contain (depending on the pay rate determinant) a locality adjustment or a special rate supplement.

Table 25 shows locality pay percentages currently authorized for each locality pay area. Prior authorized percentages are retained in CPDF internal tables. Locality pay amounts are edited against the locality pay percentages authorized as of the effective date of the action. We divide the locality adjustment amount by the basic pay amount to calculate the percentage used in these edits. We generate the locality pay area code from the duty station. The locality pay area codes are defined in The Guide to Personnel Data Standards, available on the Internet at <http://www.opm.gov/feddata/guidance.asp>.

652.10.2 If pay plan is FO, FP, GG, GH, GL, GM, or GS,
 And pay rate determinant is 0 or 7,
 And locality pay area is other than AK, HI, ON, ZZ or asterisks,
 Then the amount of the locality adjustment, as a percentage of basic pay, must
 match the percentage for the locality pay area on Table 25, be asterisks or basic
 pay plus locality adjustment must equal the EX-04 rate on Table 5.

Default: Insert asterisks in locality adjustment.

652.15.2 If pay plan is GG, GH, GM, or GS,
 And pay rate determinant is 5 or 6,
 Then the special rate supplement must be greater than zero.

Default: Accept data as submitted. Failing the edit does not cause the record or data element to be counted as an error.

Note: The default action in this edit is temporary to allow agencies time to modify special rate documentation in their HR systems. Eventually, the edit will be changed to insert asterisks in locality adjustment. This edit is not applicable to a special rate employee using special pay table identifier 0491 (LEO – Law Enforcement Officer), who works in an area other than the contiguous United States. Since a special pay table identifier is not reported for CPDF Dynamics actions, to bypass the edit, the employee’s pay plan should be converted to GL, with a pay rate determinant code of 0.

652.20.3 If agency is other than HS,
 And locality pay area is ZZ,
 And pay rate determinant is other than 5, 6, E, or F,
 And pay plan is GM or GS,
 Then locality adjustment must be zeros, spaces, or asterisks.

Default: Insert spaces in locality adjustment. Failing the edit does not cause the record or data element to be counted as an error, but agency should submit spaces for the data element.

652.30.3 If pay plan is ES, EX, FE, SL, ST, or ZZ,
 And pay rate determinant is other than A, B, E, F, or S,
 And locality pay area is other than AK, HI, ON
 Then locality adjustment must be zeros, spaces, or asterisks.

Default: Insert spaces in locality adjustment. Failing the edit does not cause the record or data element to be counted as an error, but agency should submit spaces for the data element.

Note:

Due to reporting requirement changes, the Prior Locality Adjustment field may contain (depending on the prior pay rate determinant) a prior locality adjustment or a prior special rate supplement.

Table 25 shows locality pay percentages currently authorized for each locality pay area. Prior authorized percentages are retained in CPDF internal tables. Prior locality pay amounts are edited against the locality pay percentages authorized as of the effective date of the action.  And prior pay rate determinant is 0
 Then prior locality adjustment must not be spaces or an amount, as a percentage
 of prior basic pay, greater than the percentage on Table 25 for the prior locality
 pay area.

Default: Insert asterisks in prior locality adjustment.

653.15.2 If prior pay plan is FO, FP, GG, GH, GL, GM, or GS,
 And prior pay rate determinant is 0 or 7,
 And prior locality pay area is other than AK, HI, ON, ZZ or asterisks,

* In accordance with the Guide to Personnel Data Standards, basic pay is a 6-character numeric value, with the amount rounded to the nearest dollar for an annual, school year, monthly, or biweekly pay basis. For any other pay basis, the amount is in dollars and cents with no decimal point. (However, the understood decimal point is explicitly shown above.) The amount is right justified with leading zeros.
