Under the Federal Source Code Policy, M-16-21

(https://obamawhitehouse.archives.gov/sites/default/files/omb/memoranda/2016/m_16_21.pdf) agencies must inventory all new custom code created after August 8, 2016. Only 20% of this code must be released as open source software; the rest can remain closed, but basic information about the project must still be inventoried as part of each agency's code.json file (instructions available at <https://code.gov/#/policy-guide/docs/compliance/inventory-code>). Compliance is assessed through the Code.gov Compliance Dashboard available at <https://code.gov/#/policy-guide/docs/compliance/dashboard>.
