FEHB Program Carrier Letter
All Carriers

Letter No. 1999- 017A  Date:  April 16, 1999

Fee-for-service [    ]  Experience-rated HMO [    ]  Community-rated [15 ]

SUBJECT:  2000 RATE INSTRUCTIONS
Community Rated Carriers

Enclosed are the documents which, when completed by the carrier and returned to OPM, will constitute
the carrier’s 2000 rate proposal. You must submit your proposal and the completed attachments by June
1, 1999. Please note that the June 1 deadline is required by regulations and extensions cannot be granted.

Note: Those carriers participating in the DOD demonstration project will receive separate instructions
from OPM in the near future.

The document entitled "OPM Community Rating Guidelines - 2000" gives pertinent definitions and an
overall view of our community rating policy for 2000.

A small carrier (see guidelines for definition) has three options:

1) It may submit the same detailed documentation we require for large carriers.

2) If its 1999 income from the Federal group will be $500,000 or more, the carrier may submit only
Attachments I, IA, IIB, and IIC. Such a carrier must also complete Attachments II and IIA
and keep them on file and available for OPM review.

3) If its 1999 income from the Federal group will be less than $500,000, the carrier may submit only
Attachments I, IIB, and IIC. Such a carrier need not complete or retain Attachments II or IIA.

Large carriers must complete and submit to OPM Attachments II, IIA, IIB and IIC.

Please send one copy of the rate submission to each of the following addresses:

Mr. Frank D. Titus
Assistant Director for Insurance Programs
Office of Personnel Management
P.O. Box 707
Table of Contents

Washington, DC  20044
Ms. Nancy H. Kichak
Director, Office of Actuaries
Office of Personnel Management
1900 E Street, NW., Room 4307
Washington, DC  20415

Proposals submitted by overnight delivery to Mr. Titus should be addressed as follows:

    Mr. Frank D. Titus
    Assistant Director for Insurance Programs
    Office of Personnel Management
    1900 E Street, NW., Room 3424
    Washington, DC  20415

Please remember that your first quarter enrollment report, Table 1, is due on April 15 at the following address:

    Office of Personnel Management
    Office of Insurance Programs
    (Name and Division of Carrier Contract Representative)
    P.O. Box 707
    Washington, DC  20044

Please direct your questions about the 2000 rate submission to Phil Haverstick, Sherry Simon, or Jim Quayle at (202) 606-0722, or at actuary@opm.gov.

Sincerely,

    Frank D. Titus
    Assistant Director
    for Insurance Programs

OPM Community Rating Guidelines - 2000
This discusses OPM's rating policy for the 2000 rate year.

Attachment I
This is the 2000 rate proposal/questionnaire for small carriers.

Instructions for Attachment I
This gives line-by-line instructions to small carriers for completing Attachment I.

Attachment IA
This is the Certificate of Accurate Pricing For Small Community Rated Carriers. It is for use only by small carriers whose 1999 income from the Federal group will be $500,000 or more. This certifies that the information in the reconciliation documents (Attachments III, IIIA, IIIB, kept on file at the carrier) is accurate and that OPM can rely on it as a basis for determining the Federal group's 1999 rates. A contracting official of your carrier must complete and sign this document. Note that this document pertains to the carrier's 1999 rates.

Attachment II
The rate proposal sheet. Large carriers and small carriers whose 1999 income from the Federal group will be $500,000 or more must complete this form. Only large carriers must submit it to OPM.

Instructions for Attachment II
This gives line-by-line instructions (with examples and discussion) for completing Attachment II.

Attachment IIA
This is the Community Rate Questionnaire. Large carriers and small carriers whose 1999 income from the Federal group will be $500,000 or more must complete it, but only large carriers must submit it to OPM. If you re-type this questionnaire, please be sure that the questions and answers are on only one side of each sheet.

Attachment IIB
This requests the names, telephone and fax numbers of two persons we can contact about your rate proposal. All carriers must submit this form to OPM.

Attachment IIC
This requests utilization data (based on the carrier's total enrollment) for prescription drug, hospital, and office visit benefits. This report replaces a report previously required by our Office of Financial Control and Management. Therefore, it should not result in an increased reporting burden.

General Policy For The 2000 Rate Year
We divide carriers into two groups, "large" and "small." For 2000, we define small carriers as those having less than 1500 FEHBP contracts at the time of the rate proposal. We define large carriers as those having 1500 or more contracts at the time of the rate proposal.

The amount and nature of the back-up documentation we require for small carrier rate proposals differs from the large carrier requirements.

For the 2000 rate proposal, a small carrier has three options:

1) It may submit the same detailed documentation we require for large carriers.

2) If its 1999 income from the Federal group will be $500,000 or more, the carrier may submit only Attachments I, IA, IIB, and IIC. Such a carrier must also complete Attachments II and IIA and keep them on file and available for OPM review.

3) If its 1999 income from the Federal group will be less than $500,000 the carrier may submit only Attachments I, IIB, and IIC. Such a carrier need not complete or retain Attachments II and IIA.

In what follows, "small carrier" refers to a carrier with under 1500 FEHBP contracts choosing not to submit the detailed documentation we require for large carriers (i.e., a small carrier is one that chooses option 2 or 3 above).

All carriers must derive their Federal group rates according to OPM community-rating principles. Small carriers whose 1999 Federal group income will be $500,000 or more must complete Attachment II (Proposed Biweekly Net-To-Carrier Rates For the 2000 Rate Year) and Attachment IIA (Community Rate Questionnaire) but should not send these documents to OPM. Such carriers must keep these documents on file, in accordance with the records retention clause of the contract. The OPM auditors will examine the documents during carrier audits, and the OPM Office of Actuaries may also periodically review the documents.

Small carriers whose 1999 Federal group income will be less than $500,000 are not required to complete or retain Attachments II and IIA.

Since small carriers will not submit detailed documentation, the Office of Actuaries will evaluate the proposed rates by using its reasonableness test. Rates failing this test will be further reviewed. For small carriers whose 1999 Federal group income
will be $500,000 or more, the Office of Actuaries may request detailed documentation.

**Special Audits**

OPM's Office of the Inspector General will perform special audits of carrier's 1999 rate reconciliations on a selected basis beginning in May, 1999. Although these audits will focus on the 1999 rate reconciliation, the audit staff may need to analyze rate information for the Federal group and other groups for previous years. Carriers should keep all documentation used to develop the 1999 rate reconciliation readily available for review by the audit staff.

**New Rating Areas**

If you propose a rate for a new area (or a new division of the current area), please submit a letter explaining why you have decided to add this area, and how it relates to your previous service area (for example, is the new area a portion of an existing area that has been split into two or more sections?). Also explain how your current enrollment will be affected by the addition of this new area.

**CAHPS Child Survey**

OPM will provide instructions for charging the FEHBP for the CAHPS Child Survey in the year 2000 reconciliation instructions. This charge will be limited to $7000.

**Similarly Sized Subscriber Groups (SSSGs)**

We began using the concept of "Similarly Sized Subscriber Groups" (SSSGs) in the 1991 rate year. The purpose of the SSSG concept is to ensure that the Federal group receives an equitable and reasonable rate.
Regulatory Definition

48CFR 1602.170-13 defines SSSGs as follows:

(a) Similarly sized subscriber groups (SSSGs) are a comprehensive medical plan carrier's two employer groups that:

(1) As of the date specified by OPM in the rate instructions, have a subscriber enrollment closest to the FEHBP subscriber enrollment; and

(2) Use any rating method other than retrospective experience rating; and

(3) Meet the criteria specified in the rate instructions issued by OPM.

(b) Any group with which an FEHB carrier enters into an agreement to provide health care services is a potential SSSG (including separate lines of business, government entities, groups that have multi-year contracts, and groups having point of service products).

The regulation points out in paragraph (c) that there are certain exceptions to the rule in paragraph (b). That is, the following groups must be excluded from SSSG consideration:

(1) Groups the carrier rates by the method of retrospective experience rating.

(2) Groups consisting of the carrier's own employees.

(3) Medicaid groups, Medicare groups, and groups that have only a stand-alone benefit (such as dental only).

(4) A purchasing alliance whose rate-setting is mandated by the State or local government.

Finally, the regulation states the following pertaining to how OPM will determine the Federal group's rate in relation to the SSSG's rates:

(d) OPM shall determine the FEHBP rate by selecting the lower of the two rates derived by using the two rating methods consistent with those used to derive the SSSG rates.

Enrollment and Contract Renewal Dates

For the 2000 rate year the guidelines are as follows:
1) All group enrollments (the Federal group and the SSSG enrollments) should be the latest 2000 enrollment available to the carrier (but no later than March 31, 2000).

2) The contract renewal date for 1999 SSSGs should be between July 2, 1999 and July 1, 2000. **Note:** You should interpret "renewal date" to mean the date on which a rate change (if any) is effective for the SSSG.

**Policy on Multiple Rating Areas, and Different Regions Under the Same Rate Code**

As we explained in the 1999 rate instructions, beginning with the 1999 rate year, **we have amended our policy with regard to multiple rating areas.** We now require that both SSSGs be chosen only from groups that have enrollees in the federal group’s region.

Normally, a carrier must choose two SSSGs for every federal group having a unique rate code. It is possible that a carrier could have several different geographical regions or states with federal enrollees under the same rate code.

Our SSSG policy with regard to federal groups in different regions under the same rate code is:

a) those federal groups in the same state or in the same metropolitan area must be combined and the carrier must choose two SSSGs for the combined federal group.

b) those federal groups in different states (but not in the same metropolitan area) must be combined in each state, and the carrier must choose two SSSGs for the combined federal groups in each state.

The following examples illustrate the above policies.

**Example 1 [One State, Three Codes]**

A carrier operates only in the state of Texas. It serves federal enrollees in three distinct geographical areas, Dallas, Houston and San Antonio. Each region has it's own rate code.
The carrier must choose two SSSGs for each region. Those for each region would come from groups the carrier does business with having enrollees in that region.

**Example 2 [One State, One Code]**

Same situation as in Example 1 except that one rate code applies to all three regions, meaning that the same rate applies for all federal enrollees throughout the three regions.

In this case, the carrier must combine the enrollment for all three regions, and choose two SSSGs for the combined group.

**Example 3 [Two States, One Code]**

A carrier operates in two states, Texas and Arizona. In Texas it serves federal enrollees in Dallas, Houston, and San Antonio. In Arizona, it serves federal enrollees in Phoenix, Tucson, and Tombstone. One rate code applies to all six regions.

In this case, two SSSGs are required for the combined Dallas, Houston and San Antonio regions. Two SSSGs are also required for the combined Phoenix, Tucson and Tombstone regions.

**Note:** The point of this example is to illustrate that only regions within a state should be combined.

The same principle applies if the carrier operates in several states.

**Example 4 [Two States, One Metropolitan Area, One Code]**

A carrier operates in two states, and serves a metropolitan area that is in both states. The rate code is the same for all enrollees in the metropolitan area.

In this case, two SSSGs are required for the combined metropolitan region enrollment.

**Note:** The point of this example is to illustrate the exceptional case where regions in different states should be combined for SSSG purposes.

**Example 5**

The size of the federal group in a region is 1700, and the carrier concludes that it must choose two SSSGs for this group.

The carrier contracts with the statewide XYZ corporation, which
has a statewide enrollment of 1500 with the carrier, with 100 of the enrollees living in the same region where the federal group is located.

The XYZ corporation would be a candidate for an SSSG since it has 100 enrollees in the federal group's region. The enrollment the carrier should use in comparing the size of this group to the federal group is the statewide enrollment of 1500.

**Note:** The point of this example is to illustrate that a group having only part of it's enrollment in the federal group's region can be an SSSG.

**Consistency Of Rating Methods**

We normally expect the carrier to use the same rating method for the Federal group as it uses for the SSSGs. There are situations in which we accept different rating methods. **If, however, the carrier rates an SSSG using a method not in accord with the carrier-established policies, the Federal group is entitled to any rate reduction produced by applying the SSSG rating method to the Federal group.**

**Examination Of Non-SSSG Groups**

At times, OPM may examine the rates of non-SSSG groups. The purpose of such analysis is to verify the equivalence of the Federal group and SSSG rates. For example, if an SSSG had a special benefit (e.g., dental benefit) not included in the Federal group benefit package, OPM would compare what the carrier charged the SSSG with what it charged other groups for the benefit. The purpose would be to verify that the SSSG received no discount.

**An OPM review of a non-SSSG commercial group does not make it a potential SSSG.**

**Miscellaneous Remarks**

We do not request SSSG information now. Rather, we will ask for it in 2000 when we send you the rate reconciliation instructions.

The Federal group's rates must be equivalent to the lower of the two SSSG rates, reflecting any market advantage given to an SSSG.

Since your carrier is community rated, the rates for most groups not using Adjusted Community Rating (ACR) are probably based on an underlying "community rate." Carriers using ACR normally base a group's rates on the underlying experience for that group.
OPM Community Rating Guidelines – 2000

Regardless of which community rating method the carrier uses (TCR, CRC or ACR), OPM now focuses on the rating method used for the two SSSGs to determine if a carrier has appropriately derived the Federal group rates.

**State Taxes**

5 U.S.C. 8909(f)(1) prohibits the imposition of taxes, fees, or other monetary payment, directly or indirectly, on FEHBP premiums by any State, the District of Columbia, or the Commonwealth of Puerto Rico, or by any political subdivision or other governmental authority of those entities. If your Attachment II, Line 1 rates include an amount to recover such monies from the FEHBP, you should make an adjustment for this amount in the form of a negative special benefit loading in the Special Benefit Loadings section of Attachment II.

**Special Loading For Enrollment Discrepancies**

Your contract provides for a special premium loading of 1% to account for unresolved enrollment discrepancies.

*Note: The carrier must explicitly take this loading, but may eliminate its effect by also giving the Federal group a 1% discount. The carrier should keep in mind that its contract with the FEHBP states in Section 3.6(b) “the Carrier accepts the adjustment to the subscription charges in full resolution of all obligations of the Government in connection with the subscription payments as described in this section 3.6 and waives any rights it may have to claims for subscription payments under Section 3.1(a).”*

You should place this loading on Line 4e of Attachment II.

**Community Rating Policy**

We accept three standard methods of community rating:

1) Traditional Community Rating (TCR)
2) Community Rating By Class (CRC)
3) Adjusted Community Rating (ACR)

We expect carriers using TCR or CRC for 2000 to develop rates from a community-based revenue requirement (normally in the form of a capitation rate) which is documented and verifiable. Once you establish the capitation rate, you may convert it to self and family rates using standard procedures.
A carrier using ACR may use a method based on utilization data or it may use a prospective method based on actual Federal claims data.

We ask you in the Community Rate Questionnaire to provide the criteria you use to determine your rating method for the Federal group.

**CRC Rating**

A carrier using CRC for the Federal group must provide a standard presentation of its rating method. The document "Instructions For Attachment II" includes details of this standard format and an example illustrating it. If a carrier using CRC cannot comply with OPM's standard format, it must submit its rate manual and/or other official documents that demonstrate the actuarial soundness of the carrier's CRC method.

We accept age and sex as legitimate factors for CRC. You must support any other proposed factor with carrier documentation showing that the factor predicts utilization. Our policy for industry factors is explained in the document entitled "Instructions for Attachment II".

A large carrier using CRC must furnish a table showing the age-sex distribution on which it based the Federal group's CRC adjustment factor. You must clearly show how you used this table to derive the adjustment factor.

Carriers using TCR or CRC and demographic factors (such as family size) based on group-specific data must also use group-specific data for the SSSGs. You must base all demographic factors on actual in-force group data.

**ACR Rating**

The following rules apply for carriers using ACR for the Federal group:

1) The carrier must have a documented ACR method established and implemented by 2000.

2) The carrier may use a prospective method based on actual Federal claims data, or a method based on utilization data. In either case, the carrier must keep on file all data necessary to justify the ACR rate (i.e., claims, utilization etc.)
If you use ACR, you must completely and clearly explain your method. We may ask for additional documentation from carriers using ACR, including the carrier's rating manual.
Q1. What type(s) of community rating do you propose to use for the Federal group in 2000?

[ ] TCR (Traditional Community Rating)
[ ] CRC (Community Rating By Class)
[ ] ACR (Adjusted Community Rating)

Q2. What are your carrier's 2000 proposed Federal group rates? For small carriers whose 1999 Federal group income will be greater than or equal to $500,000, these rates are on Line 5, Attachment II.

Line A Self ________ Family _________

Q3. What adjustments have you made to the proposed 2000 rates as the result of the reconciliation of the 1999 rates? Note that if the actual 1999 rates turned out to be higher than the rates estimated in the 1999 proposal, you should increase the 2000 rates to recover the loss. Likewise, if the actual rates were overestimated, you should decrease the 2000 rates to return the gain to OPM.

Line B Self ________ Family _________

Q4. What are the proposed 2000 Federal group rate (after adjustments)? (Line A ± Line B)

Line C Self ________ Family _________

OPM will complete the section below if it is necessary to reduce the proposed rates in order to draw down the contingency reserve.

Amount of excess contingency reserve: ______________________

Rate reduction necessary to generate a contingency reserve payment approximately equal to the excess.

Line D Self ________ Family _________

2000 FEHBP Rates:

Line E Self ________ Family _________
Instructions for Attachment I

Q1.
This question asks you to indicate which method of community rating the carrier uses. Small carriers may use any of the following methods: Traditional Community Rating (TCR), Community Rating By Class (CRC), or Adjusted Community Rating (ACR).

We do not require small carriers to submit detailed documentation of the rate development. But please keep in mind that if your 1999 income from the Federal group will be greater than or equal to $500,000, you must complete Attachments II and IIA before submitting Attachment I and keep them on file at the carrier. The OPM audit staff will examine the documents during periodic audits of the carrier. The Office of Actuaries may also periodically review the documents.

Q2.
This question asks for the rates that appear on Line 5 of Attachment II. These rates are the rates before any adjustments have been made as the result of the 1999 reconciliation.

Q3.
If OPM owes the carrier money because of the 1999 reconciliation, OPM will pay that money through an increase in the carrier's 2000 rates. Compute the appropriate increase, based on the results of the reconciliation.

In the case where a small carrier owes OPM because of the reconciliation, the carrier's 2000 rates will be decreased by an appropriate amount.

The rate adjustments obtained by the carrier should be placed on Line B.

Q4.
If the amounts on Line B are rate increases, then Line C = Line A + Line B. If the amounts on Line B are rate decreases, then Line C = Line A - Line B.

OPM completes the section below Line C based on negotiations between the carrier and Office of Actuaries. When we determine that sufficient excess has built up in the contingency reserve, we will propose a reduction to the carrier's rates in order to generate a contingency reserve payment.
Attachment IA

Certificate of Accurate Cost Or Pricing Data
For Community Rated Carriers

This is to certify that, to the best of my knowledge and belief:

1) The cost or pricing data submitted (or, if not submitted, maintained and identified by the carrier as supporting documentation) to the Contracting Officer or the Contracting Officer's representative or designee in support of the 1999 FEHBP rates were developed in accordance with the requirements of 48 CFR Chapter 16 and the FEHBP contract and are accurate, complete, and current as of the date this certificate is executed; and

2) The methodology used to determine the FEHBP rates is consistent with the methodology used to determine the rates for the carrier's Similarly Sized Subscriber Groups.

5. **Proposed Federal Group Rates**  
   **Rates For 2000** [(4d) + (4e)]

1. **Proposed Unadjusted FEHBP Rates in Effect for January 1, 2000**
Instructions for Attachment II

This should be the carrier’s best possible estimate of the 2000 FEHBP biweekly self and family the rates. These rates must be based on the carrier’s community rate(s) or on an OPM approved ACR methodology. You must indicate in detail how you arrived at the Line 1 rates. We provide work spaces for this in Attachment IIA, the Community Rated Questionnaire.

Carriers may use "Traditional Community Rating" (TCR), "Community Rating By Class" (CRC), or "Adjusted Community Rating" (ACR), which allows the carrier to base its rate for a group on the projected revenue of that group.

Traditional Community Rating

If you use TCR for the Federal group, the starting point is normally a capitation (per member/per month) rate. This capitation is then converted to a self rate and a family rate. The conversion process may involve group specific demographic adjustment factors. The carrier must provide the details of this conversion process.

We allow variations in the process that are consistent with OPM principles of community rating. For example, a carrier might choose to use a standard set of two-tiered rates for all its groups.

Community Rating By Class

If you use CRC for the Federal Group, we require a standard presentation of the rating method. The presentation assumes that the carrier begins with an overall per member/per month rate (capitation). As in the case of TCR, we accept minor variations that are consistent with OPM principles of community rating.

Industry Factors

Our policy on industry factors is as follows:

1) The industry factor used for the Federal group in the rate proposal must be no larger than 1.0. The proposed factor may change in the reconciliation, but in no case can it be larger than 1.0.

2) We will examine the industry factors used for the SSSGs. We require that the Federal group industry factor be no larger than 1.0 and no larger than the lowest industry factor used for an SSSG.

Example Of CRC Method
Instructions for Attachment II

If a carrier uses CRC, we require a method which is essentially as follows:

1. Derive a CRC adjustment factor (AF), which is used to adjust the capitation rate. Normally, you should base this adjustment factor on the age-sex distribution of the Federal group, although we do allow certain variations of this concept.

2. Determine the adjusted capitation rate for the Federal group (AF x capitation).

3. Convert the adjusted capitation rate to self and family rates using the same method that would be used under TCR.

Example:

<table>
<thead>
<tr>
<th>Class</th>
<th>Percentage Distribution of Members</th>
<th>Relative Utilization Factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>.10</td>
<td>.40</td>
</tr>
<tr>
<td>2</td>
<td>.20</td>
<td>.80</td>
</tr>
<tr>
<td>3</td>
<td>.45</td>
<td>1.20</td>
</tr>
<tr>
<td>4</td>
<td>.25</td>
<td>1.60</td>
</tr>
</tbody>
</table>

AF = (.10 x .40)+(.20 x .80)+(.45 x 1.20)+(.25 x 1.60) = 1.14

Capitation = $60.00 pm/pm
Adjusted Capitation = $60.00 x 1.14 = $68.40

1st Level Step-Up Factor = 1.2
2nd Level Step-Up Factor = 2.9

Self Rate = $68.40 x 1.2 = $82.08
Family Rate = $82.08 x 2.9 = $238.03

Note The Following:

1) You must include your CRC worksheets (i.e. sheets showing the relative utilization factors and the age/sex distribution for the Federal group) in your submission.
2) The relative utilization factors used for the federal group must be the same as those used for all your other CRC-rated groups.

3) Federal annuitants over age 65 should normally not be included in the calculation of the CRC factor.

4) A carrier using CRC for the Federal group should compute a Medicare loading in the normal way (i.e. along the lines of OPM’s suggested method on Page 23).

Adjusted Community Rating

A carrier using ACR for the Federal Group, may use a method based on utilization data or a prospective method based on actual Federal claims data. In either case, the carrier must keep on file all data necessary to justify the ACR rate (i.e. claims, utilization etc.) You should save backup tapes of your claims database for audit purposes.

The rules that apply for a claims-based ACR method are:

1) The experience period (and the claims used within that period) may not change in the reconciliation. It must be the same period (and the same claims) you used in the proposal.

2) If you used completion factors to convert paid claims to incurred claims, such factors must be the same for all groups for which you used a claims-based ACR method.

3) Any method used to convert paid claims to incurred claims should be consistent for all groups you rated by a claims-based ACR method.

4) If claims include special benefit claims, you should take no special benefit loadings (either in the proposal or reconciliation). Note that the claims should reflect extension of coverage, which means that you should not take the extension of coverage loading.

5) If claims include those of annuitants age 65 and over, you must reduce claims by an amount equal to Medicare income from HCFA or we must receive a credit for monies received from HCFA. See questions Q22 and Q23.

6) Loadings for administrative expenses must be either:

   a) a flat community rated pm/pm amount or
Instructions for Attachment II

b) a standard percentage of claims.

7) Any trend factor used for the Federal group must be the same as the trend factor the carrier used for other groups (that is, you may not base a trend factor for the Federal group on the Federal group's experience).

A carrier using ACR for the Federal group may also use a method based on utilization data.

WHETHER A CARRIER USES A SOPHISTICATED METHOD OF ACR USING FEDERAL CLAIMS DATA, OR A LESS COMPLEX METHOD THAT USES UTILIZATION DATA, WE EXPECT A CLEAR AND COMPLETE EXPLANATION OF YOUR METHOD. YOU SHOULD PRESENT THIS EXPLANATION AS YOUR RESPONSE TO VARIOUS QUESTIONS IN ATTACHMENT IIA.

A carrier using TCR or CRC should normally base the Line 1 rates on its estimated capitation rate (or equivalent) for 2000. At a later date, after you determine the actual January 1, 2000, capitation rate, you will do a rate reconciliation.

Note that if a carrier uses an ACR method based on Federal claims data, its reconciliation will differ very little from the proposal. The only elements of the reconciliation that might differ from the proposal are:

(i) **Trend Factor.** If you use an estimated trend factor in the 2000 proposal and later change it (before January 1, 2000) for all groups for which you use a claims-based ACR method, you must use the revised factor in the 2000 reconciliation.

(ii) **Administration Cost Factor.** If you use an estimated administration cost factor in the 2000 proposal and later change it (before January 1, 2000) for all groups for which you use a claims-based ACR method, you must use the revised factor in the 2000 reconciliation.

Note that both the trend factor and the administration cost factor must be consistent with the lowest such factors used for an SSSG.

2. **Special Benefit Loadings**

These loadings are for differences between Federal group's benefit package and the carrier's community benefits package.
Instructions for Attachment II

You must provide all backup calculations for the costs that appear on lines 2(a) through 2(c). You should clearly indicate all utilization and cost assumptions. If the benefit is a rider that you sell to other groups, there should be a uniform price (i.e., a capitation rate, or standard set of two-tiered community rates) for the benefit. Indicate clearly in your backup calculations the adjustments (if any) you have made to the uniform rate to arrive at the Federal rates shown on lines 2(a) through 2(c).

You should offset through negative loadings any benefits not provided to the Federal group which are part of the basic package. You should enter a cost of $0.00 for benefit differences with no cost.

3. **FEHBP Rates Plus Special Loadings**

The sum of all previous lines goes here.

*****************

We describe below methods of loading for standard additional benefits. You must clearly show all backup calculations.

4. **Standard Loadings**

4(a) **Extension of Coverage Loading**

Each carrier in the FEHBP must provide the following coverage without charge to the enrollee or employing agency:

1. Employees terminated from employment have 31 days additional coverage.

2. Employees or dependents confined in a hospital on the 31st day after termination have coverage continued until discharge, up to a maximum of 91 days after termination.

These coverage requirements apply whether or not the enrollee later converts his or her group coverage to an individual contract with the carrier.

We recommend a loading of .4 percent of the proposed rate for this benefit. Unless you have specific experience to justify another figure, or the community rate includes the coverage, you should use .4 percent of line 3.

4(b) **Medicare Loading**
Federal annuitants who retired after January 1, 1984, are entitled to coverage under Part A and Part B of Medicare when they reach age 65. In addition, the majority of retirees over age 65 who retired before 1984 are covered under Medicare as a result of employment in the private sector.

Medicare is the primary payer in the case of those non-working carrier members who are covered under Medicare. The carrier has a contractual obligation to obtain reimbursement from the Health Care Financing Administration (HCFA) for such Medicare eligible enrollees.

In most cases, annuitants and their covered spouses age 65 and over who are covered by Part A and/or Part B of Medicare generate more income for the carrier than would normally be necessary to cover such individuals. The carrier receives the Federal group premium, plus reimbursement from HCFA. On the other hand, Federal annuitants and covered spouses age 65 and over who are not covered under Medicare generate less income than would be necessary to cover a person in the "over 65" age category.

Therefore, the carrier is either underpaid or overpaid for Federal annuitants and their covered spouses age 65 and over. The purpose of the Medicare loading is to reflect this underpayment or overpayment.

You must document the Medicare status of Federal annuitants and their covered spouses age 65 and over, and compute a Medicare loading.

You should derive this loading by first determining the total yearly amount the carrier is overpaid or underpaid for the Federal annuitants and covered spouses. Then, convert this amount to equivalent self and family rate loadings.

You should clearly explain your method, and provide backup calculations. Q50, ATTACHMENT II A ASKS FOR A GENERAL EXPLANATION OF YOUR MEDICARE LOADING METHOD. BE SURE NOT TO SKIP THIS QUESTION.
Instructions for Attachment II

Below is an example of the sort of method we suggest. If, however, you use another method for other groups that is reasonable and well documented, you should also use it for the Federal group.

<table>
<thead>
<tr>
<th>Distribution of Federal Annuitants</th>
<th>Average Medicare and Covered Coverage Spouses*</th>
<th>Cost of HCFA Benefits</th>
<th>FEHBP Payment **</th>
<th>Gain/(Loss) to Carrier</th>
</tr>
</thead>
<tbody>
<tr>
<td>A + B</td>
<td>100</td>
<td>$120</td>
<td>$100</td>
<td>$50</td>
</tr>
<tr>
<td>A</td>
<td>65</td>
<td>120</td>
<td>60</td>
<td>50</td>
</tr>
<tr>
<td>B</td>
<td>10</td>
<td>120</td>
<td>40</td>
<td>50</td>
</tr>
<tr>
<td>None</td>
<td>50</td>
<td>120</td>
<td>0</td>
<td>50</td>
</tr>
</tbody>
</table>

(1) Revenue Loss: (65 x $10) + (10 x $30) + (50 x $70) = $4,450
(2) Revenue Gain: 100 x $30 = $3,000
(3) Net Loss = $4,450 - $3,000 = $1,450

* From Question 43, Attachment IIA
** If you use this method, the FEHBP payment should be the single rate

This positive loading of $1,450 could be spread over the self and family contracts in any reasonable manner. Note that whether the loading comes out negative or positive depends on the distribution of Federal enrollees by Medicare status.

If you use ACR to compute your rates, you must make sure that you have considered the effect of COB (coordination of benefits) income the carrier received from HCFA. You should pay particular attention to Q22 and Q23 of the questionnaire.

Note:

1) A carrier using a claims-based ACR method will normally not have a Medicare loading.

2) A carrier claiming a Medicare loading must have appropriate documentation to justify the distribution of its Medicare population submitted in Q43.

Important: Each year, OPM now sends each carrier a list of Federal group enrollees identified as Medicare enrollees through
the annual OPM/Social Security Administration Matching Study. You should not use this report without further analysis to determine the carrier's distribution of Federal Medicare enrollees (Q43), because the "unknown" category contains many different types of Medicare enrollees, including people under age 65.

Note: As explained above, the carrier is either underpaid or overpaid for Federal annuitants and their covered spouses age 65 and older (hereafter referred to as "Federal annuitants"), and this underpayment or overpayment depends on the Federal annuitant’s Medicare status.

The purpose of the Medicare loading is to reflect this underpayment or overpayment. The HMO must compute the cost of benefits for the Federal annuitants, and compare this with the income it receives on behalf of these annuitants from OPM and from HCFA. Above we suggested a method to do this, but we want to emphasize here that the HMO may derive the loading in any reasonable way that it can document.

We also want to point out the following:

1) If the HMO has a risk contract with HCFA, then (because it must file an ACR proposal with HCFA) the HMO should be able to provide OPM with a fairly accurate pm/pm estimate of the benefit cost for Federal annuitants over age 65. This cost should be roughly equal to the capitation rate the HMO receives from HCFA under the risk contract plus the premium (in terms of a capitation rate) the HMO charges the enrollee under the risk contract. The HMO should be able to determine the cost of any differences between the risk contract benefits and the FEHBP benefits.

2) If the HMO sells a Medicare supplement policy, once again, (since it has to price the policy) it should be able to provide OPM with a fairly accurate pm/pm estimate of the benefit cost for Federal annuitants over age 65. This cost should be roughly equal to the estimated capitation rate that the HMO receives indirectly from HCFA through coordination of benefits plus the premium (in terms of a capitation rate) the HMO charges for the Medicare supplement policy. The HMO should be able to determine the cost of any differences between the Medicare supplement policy benefits and the FEHBP benefits.

3) We ask about risk contracts and Medicare supplement policies in questions Q40 and Q41.

4(c) **Children's Loading**

All carriers in the Federal Employees Health Benefits Program must cover unmarried dependent children until their 22nd
birthdays (through age 21). If the carrier has a different age limit for children's coverage, a loading to the Federal family rate may be appropriate. You should use such a loading if the carrier's normal practice is to load rates for other groups in the community whose age limit for children's coverage differs from the carrier's. If, however, you use a capitation and group-specific family size in calculating group rates and include overage dependent children (i.e., children over the age limit for all dependents) in calculating average family size for the Federal group, you may not take this loading.

If you have an established method that you use to determine a children's loading for your other groups, you must use this method for the Federal group. You must document the method unless you base the loading on an approved rider, in which case we require evidence of insurance department approval. If you don't have an established method, you should use the OPM suggested method, unless you can fully document the reasonableness of an alternative method.

The following explains the reasoning behind the "OPM Suggested Method."

Assume the carrier covers children through age 18. Then, to meet FEHBP standards, the carrier must extend for 3 years for unmarried children. If we denote the family rate by F and the single rate by S, then we can consider C = F - (2 x S) to be the children's rate. Based on OPM studies, we assume that 55 percent of children age 19 through 21 are unmarried. Since C covers the children for 19 years and we must extend coverage for 3 years for 55 percent of the children, the loading is (3/19) x C x .55.

Some carrier's basic community rates cover full-time students beyond the age limit for other dependent children. In this case, the loading is (3/19) x C x .20, since OPM studies show that 20 percent of children age 19 through 21 are unmarried and not full-time students. Therefore, OPM's suggested method to compute the children's loading is as follows:

(A) Line 3 (Attachment II) Family Rate = __________
Instructions for Attachment II

(B) Line 3 (Attachment II) Single Rate = __________

(C) (A) - (2 x (B)) = Children's Rate = __________

(D) Children are insured up to what age = __________

(E) Extend Children's Coverage for 22 - (D) Years = __________

(F) Loading if Carrier's Community Rate Covers Full-Time Students: \((E) \times (C) \times 0.20\) (D)

(G) Loading if Carrier's Community Rate Does Not Cover Full-Time Students: \((E) \times (C) \times 0.55\) (D)

Note: A carrier using a claims-based ACR method, will normally not have a children's loading.

4d. **Subtotal**

Add lines 3, 4(a), 4(b), and 4(c)

4e. **Enrollment Discrepancies Loading**

This is a special 1% load to the rates which compensates the carrier for possible enrollment discrepancies.

5. **Total = Proposed Federal Group Rates for 2000**

The sum of lines 4(d) and 4(e).
Attachment IIA

COMMUNITY RATE QUESTIONNAIRE

Q1. Does the carrier use "graded" rates (i.e. adjust the community rates periodically throughout the year)?

[ ] YES
[ ] NO

If No, what method do you use to insure that no group bears a disproportionate share of the carrier's yearly revenue requirement?

Q2. With regard to dependent coverage:

a. Your basic community rate includes coverage for all unmarried dependents up to what age? (An answer of age 19 would mean that coverage ceases on the 19th birthday) ________

b. Is there a separate limiting age for coverage of full-time students?

[ ] YES          What is it? __________
[ ] NO

c. If a group requires dependent coverage to an age different from your normal limiting age, do you adjust that group's rate to allow for this difference?

[ ] YES
[ ] NO
Q3. What type(s) of community rating do you propose to use for the Federal Group in 2000?

[ ] Traditional Community Rating (TCR)
  a.[ ] Standard (Book) Rating
  b.[ ] Variable (Group Specific) Rating
[ ] Community Rating By Class (CRC)  Go To Q7
[ ] Adjusted Community Rating (ACR)  Go To Q19

****************************
Questions 4 through 6 pertain to carriers which use traditional community rating (TCR) for the Federal Group.
****************************

Q4. Do you use a standard set of tiered rates applicable to all groups with a tiered rate structure?

[ ] YES
[ ] NO

If Yes, what are they?
Self ________ Family ________
Self ________ Couple ________ Family ________

Q5. Do you begin your rate development with a capitation rate, and then convert it to the self and family rates?

[ ] YES
[ ] NO

If Yes, what is the capitation rate?
Capitation Rate = ________

Note that you may check both Q4 and Q5 "Yes" if you use a standard set of tiered rates which are derived from a capitation rate.
Attachment IIA

Q6. Do you use "step-up" factors to convert the capitation rate to the self and family rates?

[ ] YES  If Yes, Go To Q33

[ ] NO  If No, explain, then Go To Q34

Questions 7 through 18 pertain to carriers that use Community rating by class (CRC) for the Federal group.

Q7. Give a simple narrative explanation of how you derived your rates. **DO NOT SKIP THIS QUESTION AND DO NOT REFER US TO OTHER SHEETS.** **WHAT WE WANT HERE IS A SIMPLE NARRATIVE DESCRIPTION OF YOUR METHOD.**

Q8. Do you use CRC for all your groups?
Attachment IIA

[ ] YES
[ ] NO

If No, what is your criteria for using CRC?

Q9. What CRC factors do you use?

[ ] Age
[ ] Sex
[ ] Other __________, __________, __________.

Q10. What capitation rate do you begin with?

Capitation Rate = __________
Q11. What is the adjustment factor you use to adjust the capitation?

Adjustment Factor = __________

What is your adjusted capitation rate?

Adjusted Capitation Rate = __________

Explain how you derived the CRC adjustment factor. In particular, on what population data are the CRC utilization factors based? How often do you update the data on which the CRC utilization factors are based?

Q12. Show how you derive the adjusted capitation rate. 

DO NOT SKIP THIS QUESTION. WHAT WE WANT IS A SIMPLE
NARRATIVE EXPLANATION OF HOW YOU ADJUST THE CAPITATION RATE. IF THERE ARE OTHER SHEETS WITH DETAILED CALCULATIONS, TELL US HERE IN SIMPLE LANGUAGE WHAT IS DONE ON THOSE SHEETS.
Attachment IIA

Q13. Have you enclosed any worksheets (i.e. sheets showing age/sex distribution and relative utilization factors) that you used to derive the CRC adjustment factor? Please note that you must have documented support for the CRC age/sex factors.

[ ] YES
[ ] NO
[ ] NA

If No or NA, explain. (Note: We normally expect to see the worksheets from which you derive the CRC adjustment factor)

Q14. Do you use "step-up" factors to convert the adjusted capitation rate to the self and family rates?

[ ] YES
[ ] NO

If No, explain
Q15. Explain how you derive the "relative utilization factors" associated with your age/sex distribution sheet.

Note that we would expect the factors to be based on the utilization experience of the different age groups of the total employee population the carrier services. In some cases, a carrier might use factors based on some other large population. Please make it clear to us exactly where your relative utilization factors come from, and on what population they are based.

IMPORTANT! DO NOT SKIP THIS QUESTION

Q16. When you derive the CRC adjustment factor, do you include the number of Federal annuitants over age 65 anywhere in the calculation? What about the number of Federal annuitants under age 65? In general, explain how you use the group of Federal retirees (if at all) in your calculation of the CRC factor.

IMPORTANT! DO NOT SKIP THIS QUESTION
Q17. If you use industry factors as part of your CRC method, do you anticipate that either of your SSSG's will have an industry factor less than 1.0?

[ ] YES

[ ] NO

Q18. If you answered Q17 Yes, did you apply to the Federal group rates the lowest industry factor anticipated for an SSSG?

[ ] YES

[ ] NO

If No, explain. The Federal group should receive the lowest industry factor less than 1.0 given to an SSSG.

*************************
If you do not use ACR in any part of your rate development, Go To Q33. ****************************
Questions 19 through 31 pertain to carriers that use adjusted community rating (ACR) for the Federal group.

Q19. Do you use ACR for all your groups?

[ ] YES

[ ] NO

If No, what is your criteria for using ACR?

Q20. What method of ACR do you use to rate the Federal group in 2000?

[ ] A Method Based On Utilization Factors.

[ ] Other

Note: You should have on file any claims/utilization data supporting the rates for the Federal group.

Q21. If your answer was "Other" for Q20, give a simple, but comprehensive explanation of how you developed your rates. Use extra sheets if necessary.
Q22. Are age 65 or above retirees included in the claims or utilization data used to determine the ACR factor or rates?

[ ] YES

[ ] NO

If No, you should include a standard Medicare loading.

Q23. If you answered yes to Q22, are HCFA reimbursements included in the Federal group's experience?

[ ] YES

[ ] NO

If No, you should take a negative Medicare loading which accounts for all monies received from HCFA or saved because Medicare was the primary payer (i.e. responsible for most of the claim payments).

If Yes, there should be no Medicare loading.

Q24. Did you reduce claims used in the rate development by COB income that the carrier received from other insurance carriers (excluding HCFA)?

[ ] YES

[ ] NO

If No, you should give us a credit for any monies received from other insurance carriers.
Q25. If you used an ACR method using Federal claims data to compute rates, clearly explain this method. **DO NOT SKIP THIS QUESTION, AND DO NOT REFER US TO OTHER SHEETS. WHAT WE WANT HERE IS A SIMPLE NARRATIVE DESCRIPTION OF YOUR METHOD.**
Q26. Do you use completion factors to derive incurred claims?
   [ ] YES
   [ ] NO

Q27. If you answered Yes to Q26, you should use the same set of completion factors for all your groups. Do you?
   [ ] YES
   [ ] NO
   [ ] NA
   If No, explain.

Q28. Explain how you compute the administrative charge.
   **DO NOT SKIP THIS QUESTION**
Attachment IIA

Q29. Did the claims used in the rate development reflect special benefits?

[ ] YES

[ ] NO

Q30. Do you derive an adjusted capitation rate by using an ACR factor that was derived from actual claims data?

[ ] YES

[ ] NO

If Yes, what is the adjusted capitation rate?

Adjusted Capitation Rate = ____________

Q31. Do you use step-up factors to convert an adjusted capitation rate to the self and family rates?

[ ] YES

[ ] NO

If Yes, Go To Q33

If No, Go To Q34
Attachment IIA

Question 32 is for carriers that answered Q20 by saying they use "A Method Based On Utilization Data".

Q32. Give a detailed explanation of how you derive the rates on Line 1 of Attachment II. DO NOT SKIP THIS QUESTION OR REFER US TO OTHER SHEETS. WHAT WE WANT HERE IS A SIMPLE NARRATIVE DESCRIPTION OF YOUR METHOD.
Q33. a. If you use step-up factors, what are they? Specifically, what step-up factor do you use to convert the capitation rate (or the adjusted capitation rate) to the self rate? What step-up factor do you use to convert the self rate to the family rate?

Self/Capitation = ____  Family/Capitation = ____

b. How do you derive the above step-up factors? Explain briefly (we prefer a numerical formula for each factor as the explanation). Example:

\[
\text{Self/Capitation} = 1.17 = \frac{.40 + .60(3.5)}{.40 + .60(2.9)}
\]

c. Are these step-up factors group-specific (i.e., derived using the demographics of the Federal group)? Or, are the step-up factors based on overall population demographics?

[ ] Group Specific

[ ] Based on Overall Carrier Population Demographics

d. If you use group-specific factors, do you use them for all groups?

[ ] YES

[ ] NO

If No, what is your criteria for using group-specific factors?
Q34. a. If you use enrollment-mix or other demographic assumptions at any point in the development of the 2000 Federal group rates (including development of step-up factors), what are they?

% Self Contracts __________
% Family Contracts __________
Family Size __________
Other:

b. What is the "as of" date of the above enrollment? __________

c. If you use group-specific family size in developing the Federal group rates, were overage dependent children (i.e., children older than the age limit for all unmarried dependents given in Q2a) included in determining the group's family size?

[ ] YES
[ ] NO
Q35. What is the source of your demographic information? Is the same source used for all groups? If not, where do you get the demographic information for other groups?

Q36. If you do not use step-up factors to convert a capitation rate to the self and family rates, explain in detail what you do.
Q37. Are the special benefits listed in line 2, Attachment II of the 2000 proposal different from those that you offered in 1999?

[ ] YES
[ ] NO

If Yes, explain.

Q38. With regard to the special benefits shown in line 2, Attachment II: Are any of them a rider offered to other groups?

[ ] YES
[ ] NO

If Yes, indicate which special benefits are riders.

Q39. With regard to Federal qualification:

a. Is the carrier Federally qualified?

[ ] YES
[ ] NO

b. If No, has the carrier applied for Federal qualification?

[ ] YES
[ ] NO
Q40. The FEHBP requires coordination of benefits (COB) with HCFA for Federal annuitants and their covered spouses who are entitled to Medicare.

a. Do you have a risk or cost contract with HCFA?

[ ] YES  [ ] Risk Contract  [ ] Cost Contract

[ ] NO

b. Are any Federal group enrollees in the carrier covered under the carrier's risk or cost contract?

[ ] YES

[ ] NO

[ ] NA

c. If the answer to Q40(a) is Yes, explain the arrangement you have with HCFA, describe all benefit packages you offer enrollees under the risk contract, and the premiums (if any) the individuals enrolled under the risk contract pay the HMO.
Attachment IIA

Q41. Does your HMO sell a Medicare supplement policy?

[ ] YES
[ ] NO

If Yes, describe the benefit packages of any Medicare supplement policies you offer, and the premiums you charge for them.
Attachment IIA

Q42. Explain how do you coordinate benefits for Federal Medicare annuitants and Medicare dependent spouses.

Q43. Show the number of Federal annuitants and their covered spouses age 65 and older enrolled with the carrier using the following categories:

- Medicare Part A and Part B
- Medicare Part A Only
- Medicare Part B Only
- Neither Part A nor Part B
- Cannot Determine

Note: The sum of the numbers in the 5 blanks above should be the total number of Federal annuitants and their covered spouses age 65 and older enrolled with the carrier.

Note: Important! Before you complete the above table, review the note (at the top of page 22) pertaining to the list of Medicare enrollees OPM sends the carrier each year.
Q44. How do you determine the numbers that you have in the
distribution in Q43?

Q45. Do your Line 1 rates reflect any tax, fee or monetary
payment imposed on the carrier by a state or local
government?

[ ] YES
[ ] NO

If Yes, have you included a negative loading in the Special
Benefits section of the proposal?

[ ] YES
[ ] NO

If No, does your carrier do business in Arkansas, Arizona,
Connecticut, D.C., Florida, Illinois, Kansas, Iowa,
Louisiana, Maine, Maryland, Massachusetts, Minnesota,
Nevada, New Hampshire, New Mexico, New York, Oklahoma,
Oregon, Tennessee, Texas, Virginia, Washington, West
Virginia, or Wisconsin?

[ ] YES
[ ] NO

If Yes, explain why you included no negative loading.
Q46. If you use different rating methods (i.e. TCR, CRC, ACR) for different groups, describe your criteria for the use of each method.

Q47. How do you rate your state and local government groups?
Q48. BACKUP CALCULATIONS - Attachment II, Line 1 Rates

a) If you use Traditional Community Rating (TCR), show how you derive the rates on Line 1, Attachment II of the proposal. If they are two-tiered rates that you use for all groups, and will be backed by an insurance department filing, state this. If you derived the rates by converting a capitation into self and family rates, show the calculations.

If you use Community Rating By Class (CRC) or Adjusted Community Rating (ACR) show any details of the derivation of the Line 1, Attachment II rates that were not given in the previous parts of this questionnaire. DO NOT SKIP THIS QUESTION. WHAT WE WANT HERE IS A SIMPLE NARRATIVE EXPLANATION (BACKED UP BY CALCULATIONS) OF HOW YOU DERIVED THE LINE 1 RATES. IF THERE ARE OTHER SHEETS WITH DETAILED CALCULATIONS, TELL US HERE IN SIMPLE LANGUAGE WHAT IS DONE ON THOSE SHEETS. MAKE CERTAIN THAT THE EXPLANATION IN THIS SECTION MAKES IT CLEAR TO US WHERE THE RATES ON LINE 1 COME FROM.
Q49. BACKUP CALCULATIONS - Attachment II, Line 2 Rates - Special Benefit Loadings

Show specifically how you derived each of the special benefit loadings. Be sure to include all utilization assumptions. **DO NOT SKIP THIS QUESTION.**

Q50. BACKUP CALCULATIONS - Medicare Loading

If you have Medicare Loadings on line 4b, Attachment II, explain how you derived these loadings. Include calculations. Clearly indicate how Medicare risk or cost payments (if any) are accounted for.
Q51. BACKUP CALCULATIONS - Children's Loading

If you use a children's loading, show how you derived it. The OPM suggested method is shown below. If, however, you use what you believe to be a more reasonable or accurate method for your other groups, then you must use it for the Federal group. Fill in the appropriate spaces below if you use the OPM method to obtain the children's loading. If you use another method, provide details below.

**OPM Suggested Method**

(A) Line 3 (Attachment II) Family Rate = ___________

(B) Line 3 (Attachment II) Single Rate = ___________

(C) (A) - (2 x (B)) = Children's Rate = ___________

(D) Children are insured up to what age = __________

(E) Extend Children's Coverage for 22 - (D) Years = __________

(F) Loading if Carrier's Community Rate Covers Full-Time Students:
   \[
   \frac{(E) x (C) \times .20}{(D)}
   \]
   = __________

(G) Loading if Carrier's Community Rate Does Not Cover Full-Time Students:
   \[
   \frac{(E) x (C) \times .55}{(D)}
   \]
   = __________
