SUBJECT: 2000 Rate Instructions for Experience-Rated Plans

Enclosed are the questionnaire and tables that will constitute your rate proposal for participation in the FEHBP for 2000. You must fully document all estimates with respect to assumptions and actuarial methodology. Your submission is due on May 31, 1999.

For plans participating in the DoD Pilot Project you must submit separate abbreviated documentation. This is the same documentation as for new plans which is noted in the questionnaire under item 1 (c).

All plans must complete Tables 1, 2 and the questionnaire. HMO’s must complete Table 3 and include it with the submission and submit Table 4 as soon as the May data is available but no later than June 20. If you provide some services through capitation, enclose separate schedules covering 1998 as well as the 4 and 5 month periods for 1999 in which claims are broken out by capitated services, non-capitated services, and total services.

Fee for service plans may omit Tables 3 and 4 but must confirm that the submission of monthly incurred claims is current.

If your plan has two options, rate each option as a separate plan and submit separate documentation for each option.

You should set your proposed rates so that the sum of the ending special reserve balance plus the ending contingency reserve balance moves toward the reserve goal of 2 months of total outgo. If you project that your rates will not achieve the reserve goal as of December 31, 2000, please explain why your proposed rates are more reasonable than rates which would achieve the 2-month goal.

You should send one copy of the submission including your proposal, the summary statement to your December 31, 1998, accounting statement, the questionnaire and appropriate tables to:
Office of Personnel Management  
Ms. Nancy H. Kichak  
Director, Office of Actuaries  
1900 E Street, NW., Room 4307  
Washington, DC  20415

Please send a duplicate hard copy to:

Office of Personnel Management  
Mr. Frank D. Titus  
Assistant Director for Insurance Programs  
1900 E Street, NW., Room 3424  
Washington, DC  20415

Email a Lotus, Excel or Quattro version of the questionnaire to RVGRESH@OPM.GOV.

If you have any questions, please contact Ms. Sherry Simon or Mr. Ron Gresch at (202) 606-0722. You will receive a statement of your December 31, 1998, contingency reserve balance in the near future.

Sincerely,

Frank D. Titus  
Assistant Director  
for Insurance Programs

Enclosures
Experience-Rated Questionnaire for 1999 Rates

Note: Options are Rated as Separate Plans and Require Separate Questionnaires

1a. Attach a copy of the summary statement of your 12/31/98 accounting statement.

1b. Email the information as shown in the enclosed sample format on the following page to RVGRESH@OPM.GOV.

1c. Abbreviated documentation for new plans and DoD Pilot Project: Item numbers refer to the questionnaire.

2. Reconcile your 1997 and 1998 premium income to your 1997 and 1998 enrollment by adjusting enrollment to agree with premium income actually received. For 1997 and 1998 premium income use accounting summary figures for Semi-Monthly Premiums received by your LOC account adjusted by beginning and ending accrued values. It is advisable to perform a similar reconciliation for 1999 using the fact that most second monthly payments consist of one monthly annuitant premium and one biweekly premium and most first monthly payments consist of one biweekly premium.

*Adjusted Enrollment = Initial Estimated Enrollment x (Actual Premium Income/Calculated Income)
3. (a) As of 12/31/98 what were the total claims paid to date for services incurred in
   1996
   1997
   1998

(b) As of 4/30/99 what were the claims paid in 1999 for services incurred in
   1996
   1997
   1998
   1999

The sum of these values should equal the claims paid in the first 4 months of 1999

(c) What is your estimate of the ultimate claims and what portion of these claims have been paid as of 12/31/98 and as of 4/30/99.

<table>
<thead>
<tr>
<th>Ultimate Claims</th>
<th>Portion Paid as of 12/31/98 (a)/(c)</th>
<th>Portion Paid as of 4/30/99 [(a)+(b)]/(c)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1996</td>
<td>P1=_________________________</td>
<td>____________________</td>
</tr>
<tr>
<td>1997</td>
<td>P2=_________________________</td>
<td>____________________</td>
</tr>
<tr>
<td>1998</td>
<td>P3=_________________________</td>
<td>____________________</td>
</tr>
<tr>
<td>1999</td>
<td></td>
<td>____________________</td>
</tr>
</tbody>
</table>

The portion paid as of 12/31/98 and as of 4/30/99 should be representative of past experience. If they are not, explain why. Ultimate claims and the portion paid as of 12/31/98 (P1,P2,P3) will be used in item 11.

Explanation if Necessary:
The product of the prior year's claims and the factors in items 4, 5, 6, 7, and 8 below should equal the present year's claims and for 1997 and 1998 should agree with the ultimate claims stated in item 3. Item 9 contains a summary of items 4, 5, 6, 7 and 8.

4. What was the change in enrollment factor for:
   1997 to 1998 ___________
   1998 to 1999 ___________
   
   What is your estimated factor for:
   1999 to 2000 ___________

You should weight the aggregate enrollment factor for both self and family contracts by either premiums or claims.

We prefer that you obtain the enrollment factor by using a weighted average of claims costs broken down by groups such as active, Medicare and non-Medicare annuitants enrollees and by self and family contracts. Please provide your best estimate of claims cost by type of claimant and category of enrollment. If you do not have claims data available, we suggest you use the following weights:

<table>
<thead>
<tr>
<th></th>
<th>Self</th>
<th>Family</th>
</tr>
</thead>
<tbody>
<tr>
<td>Active</td>
<td>46</td>
<td>121</td>
</tr>
<tr>
<td>Medicare Annuitants</td>
<td>56</td>
<td>105</td>
</tr>
<tr>
<td>Non-Medicare Annuitants</td>
<td>106</td>
<td>194</td>
</tr>
</tbody>
</table>

The formula you would use would appear as follows:

\[
EF(\text{yr}) = \frac{[46\times ASE(\text{yr})] + [56\times MSE(\text{yr})] + [106\times NMSE(\text{yr})] + [121\times AFE(\text{yr})] + [105\times MFE(\text{yr})] + [194\times NMFE(\text{yr})]}{[46\times ASE(\text{yr-1})] + [56\times MSE(\text{yr-1})] + [106\times NMSE(\text{yr-1})] + [126\times AFE(\text{yr-1})] + [105\times MFE(\text{yr-1})] + [194\times NMFE(\text{yr-1})]}
\]

where

\[
EF = \text{Enrollment Factor}
\]
ASE = Active Self Enrollment
MSE = Medicare Self Enrollment
NMSE = Non-Medicare Self Enrollment
AFE = Active Family Enrollment
MFE = Medicare Family Enrollment
NMFE = Non-Medicare Family Enrollment

To obtain the factor weighted by premiums use the following formula:

\[ EF(yr) = \frac{[SE(yr) \times SP(yr-1)] + [FE(yr) \times FP(yr-1)]}{[SE(yr-1) \times SP(yr-1)] + [FE(yr-1) \times FP(yr-1)]} \]

where EF = Enrollment Factor
SE = Self Enrollment
FE = Family Enrollment
SP = Self Premium
FP = Family Premium

Explanation if Necessary:

5. What was the change in benefits factor for:
   1997 to 1998 __________
   1998 to 1999 __________
   What is your estimated factor for:
   1999 to 2000 __________

You should weight the aggregate benefit factor for both self and family contracts by premiums and enrollment. You should base all benefit changes on premium rate changes that were agreed upon during prior rating unless better data is available, i.e.,

\[ BF(yr) = \frac{[SE(yr) \times SP(yr-1) + SBC(yr)] + [FE(yr) \times FP(yr-1) + FBC(yr)]}{[SE(yr) \times SP(yr-1)] + [FE(yr) \times FP(yr-1)]} \]

where BF = Benefit Factor
SE = Self Enrollment
SBC = Self Benefit Change
SP = Self Premium
FBC = Family Benefit Change
FE = Family Enrollment
FP = Family Premium
If your gross premium rates are substantially different than claims plus expenses it will be necessary to adjust your calculated benefits factors.

Explanation if Necessary:

6. What was the trend factor for:

<table>
<thead>
<tr>
<th>Trend Factor</th>
<th>Inflation Factor</th>
<th>Utilization Factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>1997 to 1998</td>
<td>= __________ x ________</td>
<td></td>
</tr>
</tbody>
</table>

What trend factor is projected for:

<table>
<thead>
<tr>
<th>Trend Factor</th>
<th>Inflation Factor</th>
<th>Utilization Factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>1998 to 1999</td>
<td>= __________ x ________</td>
<td></td>
</tr>
<tr>
<td>1999 to 2000</td>
<td>= __________ x ________</td>
<td></td>
</tr>
</tbody>
</table>

Explanation if Necessary:

7. Selection as a result of movement between plans in the FEHBP is common. You can quantify this factor for a given year using the following:

\[
SEL = 1 + [(EI-1) \times RUI] + [(ED-1) \times RUD] \\
\frac{EI + ED - 1}{EI + ED - 1}
\]

where
- SEL = Selection Factor
- EI = Enrollment Increase Factor
- ED = Enrollment Decrease Factor
- RUI = Relative utilization of Enrollment Increases
RUD = Relative utilization of Enrollment
Decreases

As an illustration, suppose that in 1996 your plan consisted of 100 enrollments who cost $1000 each. In 1996 your plan gained 30 enrollments and lost 40 enrollments. The enrollments the plan gained would have cost $1400 in 1996 and the enrollments the plan loss cost $800 in 1996. The selection factor for 1997 is

\[ 1.222 = \frac{[1.0 \times 1] + [0.3 \times 1.4] + [-0.4 \times 0.8]}{1 + (0.3) + (-0.4)} \]

What were these factors if any for:

<table>
<thead>
<tr>
<th>Selection</th>
<th>EI</th>
<th>ED</th>
<th>RUI</th>
<th>RUD</th>
</tr>
</thead>
<tbody>
<tr>
<td>1997 to 1998</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

What factors if any are projected for:

| 1998 to 1999 |     |     |     |     |
| 1999 to 2000 |     |     |     |     |

Explanation if Necessary:

8. What other factors such as the institution or expansion of a PPO have had an effect upon incurred claims:

<table>
<thead>
<tr>
<th>Total of other Factors</th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1997 to 1998</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

What other factors if any will have an effect upon incurred claims:

| 1998 to 1999 |     |     |     |
| 1999 to 2000 |     |     |     |
### 9. Summary of Incurred Claims Development

<table>
<thead>
<tr>

</table>

(Allowable expenses and service charge is negotiated with the Office of Insurance Programs.)

Describe your reinsurance arrangements if any.

13. 1999 Contingency Paymen, Interest and Investment Income, and Reserve Calculations

(a) Contingency Reserve

(1) Contingency Reserve Balance 12/31/98
(from OPM's Office of Actuaries)

(2) Claims Paid During Last 6 Months of 1998

(3) Administrative Expenses for 1998

(4) Three and One-Half Months of Total
Outgo \[ (\frac{7}{12} \times 2) \] + \[ (\frac{7}{24} \times 3) \]

(5) Preferred Minimum Balance of 1-1/2 Month of Total Outgo \[ (\frac{3}{7} \times 4) \]

(6) Accrued Reserve + Special Reserve 12/31/98 \[ 10(c) + 10(f) \]

(7) 1999 Contingency Reserve Payment (compute as follows)
\( (a) \) \( (4)-(6) = \) [put 0 here if (4)-(6) is negative]

\( (b) \) \( (1)-(5) = \) [put 0 here if (1)-(5) is negative]

\( (c) \) Contingency Reserve Payment: Lesser of (a) and (b) =

Return of Excess to the Contingency Reserve Fund:

\( (d) \) If (4)-(6) is negative, that is if the accrued reserve plus special reserve exceeds three and one-half total outgo, the excess must be returned to the contingency reserve fund. What is it?

\( (6)-(4) = \)

(8) Payments to Contingency Reserve Fund During 1999 (approximately 3.88% of premium income)

(9) Interest on Contingency Reserve Fund During 1999

\[ = IR \times [BCR + .5 \times (PCR) - .5 \times (CRP) + SIF] \]
\[ = .05 \times [(1) + .5 \times (8) + .5 \times ((7)(d)-(7)(c)) + (3/52 \times SI)] \]

where IR = Interest Rate
BCR = Beginning Contingency Reserve Balance
PCR = 1999 Payments to Contingency Reserve
CRP = 1999 Contingency Reserve Payment to Plan
SIF = Subscription Income Float
SI = 1999 Subscription Income

(10) Contingency Reserve Balance 12/31/99

\( (1) + (8) + (9) + [7(d) - 7(c)] \)

(b) Interest plus Investment Income

### Financial Summary and Special Reserve - 1999

#### (1) Income

- **(a)** Premium Income
- **(b)** Contingency Reserve Payment
  
  \[13(a)(7)(c) - 13(a)(7)(d)\]
- **(c)** Interest Plus Investment Income
- **(d)** Total

#### (2) Outgo

- **(a)** Incurred Claims [9]
- **(b)** Expenses [12]
- **(c)** Total

#### (3) Gain (Loss) [1(d) - 2(c)]

#### (4) Reserves

- **(a)** Beginning Special [10(f)]
- **(b)** Ending Special [3 + 4(a)]
- **(c)** Ending Contingency [13(a)(10)]

#### (5) Reserve Goal (in number of months)

\[12 x \left[\frac{4(b) + 4(c)}{2(c)}\right]\]

### 14. 2000 Contingency Payment, Investment Income, and Reserve Calculations
(a) Contingency Reserve

(1) Contingency Reserve Balance 12/31/99
   [from 13(a)(10)]

(2) Claims Paid During Last 6 Months of 1999. Use the Product of 1998 Claims
   from 13(a)(2) and the Percentage Change from 1998 incurred Claims to 1999
   incurred claims [item 9].

(3) Administrative Expenses for 1999

(4) Three and One-Half Months of Total Outgo
   \[(7/12) \times (2) \] + \[(7/24) \times (3)\]

(5) Preferred Minimum Balance of 1-1/2 Month of Total Outgo
   \[(3/7) \times (4)\]

(6) Accrued Reserve + Special Reserve 12/31/99
   \[11(b) + 13(c)(4)(b)\]

(7) 2000 Contingency Reserve Payment
    (compute as follows)
    \(a\) \((4)-(6) = \) ________ (put 0 here if \((4)-(6)\) is negative)
    
    \(b\) \((1)-(5) = \) ________ (put 0 here if \((1)-(5)\) is negative)
    
    \(c\) Contingency Reserve Payment:
    Lesser of \((a)\) and \((b)\) = ________

    Return Of Excess to the Contingency Reserve Fund:
    
    \(d\) If \((4)-(6)\) is negative, that is if the accrued reserve plus special reserve exceeds three and one-half months of total outgo, the excess must be returned to the contingency reserve fund. What is it?
    \((6)-(4) = \) ________

(8) Payments to Contingency Reserve Fund
    During 2000 (approximately 3.88% of premium income)

(9) Interest on Contingency Reserve Fund
    During 2000
    
    \[= IRx[BCR+.5x(PCR)-.5x(CRP)+SIF]\]
\[ = 0.05 \times [(1) + 0.5 \times (8) + 0.5 \times ((7)(d) - (7)(c)) + (3/52 \times SI)] \]

where
- IR = Interest Rate
- BCR = Beginning Contingency Reserve Balance
- PCR = 2000 Payments to Contingency Reserve
- CRP = 2000 Contingency Reserve Payment to Plan
- SIF = Subscription Income Float
- SI = 2000 Subscription Income

(10) Contingency Reserve Balance 12/31/00
\[
(1) + (8) + (9) + [(7)(d) - (7)(c)]
\]

(b) Interest plus Investment Income

(1) Accrued Reserve+Special Reserve as of 12/31/99

(2) Premium Income Accrued but Unpaid as of 12/31/99. Use the Product of b(2) for 1998 and the Percentage Change in Premium Income Between 1998 and 1999 from Item 2.

(3) 2000 Contingency Reserve Payment
\[ 14(a)(7)(c) - 14(a)(7)(d) \]

(4) 2000 Total Premium Income

(5) 2000 Incurred Claims

(6) 2000 Expenses

(7) 2000 Average Balance:
\[
(1)-(2)+{0.5 \times [(3)+(4)-(5)-(6)]}
\]

(8) 2000 Interest Plus Investment Income:
\[ 0.05 \times (7) \]

(c) Financial Summary and Special Reserve - 2000

(1) Income

(a) Premium Income

(b) Contingency Reserve Payment
\[ [14(a)(7)(c)] - [14(a)(7)(d)] \]

(c) Interest plus Investment Income

(d) Total
