GRADING INSTRUCTIONS ..................................................................................................................... 10
INTRODUCTION

This position classification flysheet establishes the Government Information Series, 0306, and provides the series definition and titling instructions. In the General Schedule position classification system established under chapter 51 of title 5, United States Code, the positions addressed here would be two-grade interval positions at the grade GS-09 and above.

The term “General Schedule” or “GS” denotes the major position classification system and pay structure for white collar work in the Federal Government. Agencies that are no longer subject to chapter 51 have replaced the GS pay plan indicator with agency-unique pay plan indicators. For that reason, reference to General Schedule or GS has been omitted from this flysheet.

COVERAGE

This position classification flysheet covers the following occupational series: Government Information, 0306.

ESTABLISHING THE OCCUPATIONAL SERIES AND STANDARD

Issuance of this flysheet establishes this occupational series as described in the following table. The table also indicates how to classify work covered by this series.

<table>

GENERAL SERIES DETERMINATION GUIDELINES

Determining the correct series for a position is usually apparent by reviewing its assigned duties and responsibilities and then comparing them to the series definitions and general occupational information the classification flysheet or standard provides. Generally, the classifier decides on the series for a position based on the primary work of the position, the highest level of work performed, and the paramount knowledge required to do the work of the position. In some situations, however, following this guidance may present difficulties.

When the work of a position matches more than one occupation, then use the following guidelines to determine the appropriate series for classification purposes.

- **Paramount knowledge required.** Although there may be several different kinds of work in the position, most positions will have a paramount knowledge requirement. The paramount knowledge is the most important type of subject matter knowledge or experience required to do the work.
- **Reason for existence.** The primary purpose of the position or management’s intent in establishing the position is a positive indicator for determining the appropriate series.
- **Organizational mission and/or function.** Positions generally align with the mission and function of the organization to which they are assigned. The organization’s function is often mirrored in the organizational title and may influence the appropriate series.
- **Recruitment source.** Supervisors and managers can help by identifying the occupational series that provides the best qualified applicants to do the work. This is closely related to the paramount knowledge required.

The Additional Occupational Considerations section of this flysheet provides examples where the work may involve applying related knowledge and skills, but not to the extent that it warrants classification to this occupation.

For further guidance, refer to The Classifier’s Handbook.
## Official Titling Provisions

Title 5, United States Code, requires the U.S. Office of Personnel Management (OPM) to establish authorized official position titles to include a basic title (Government Information Specialist) may be appended with one or more prefixes and/or suffixes. Agencies must use the official position titles for human resources management, budget, and fiscal purposes. Instructions for assigning official position titles are provided in this section.

### Supervisors and Leaders

Add the prefix “Supervisory” to the basic title when the agency classifies the position as supervisory. If the position is covered by the General Schedule, refer to the [General Schedule Supervisory Guide](#) for additional titling information.

Add the prefix “Lead” to the basic title when the agency classifies the position as leader. If the position is covered by the General Schedule, refer to the [General Schedule Leader Grade Evaluation Guide](#) for additional titling information.

### Specialty or Parenthetical Titles

Specialty titles are typically displayed in parentheses and referred to as parenthetical titles. Agencies may supplement the authorized title of Government Information Specialist with agency established parenthetical titles if necessary for recruitment or other human resources needs.

### Organizational Titles

Organizational and functional titles do not replace, but rather complement, official position titles. Agencies may establish organizational and functional titles for internal administration, public convenience, program management, or similar purposes. Examples of organizational titles are Branch Chief or Division Chief. Examples of functional titles are Chief of FOIA/PA.
**GOVERNMENT INFORMATION, 0306**

### Series Definition

This series includes positions responsible for administering, analyzing, supervising, or performing work involved in establishing, disseminating or managing Government information. Government Information Specialists formulate policy, advise agency management, and ensure compliance with Federal laws governing the flow of information. The work also involves the safeguarding of Government information while supporting accountability and transparency.

### Titling

The basic title specified for this series is *Government Information Specialist*.

### General Occupational Information

Government information work involves implementing policies and procedures to manage Government information and providing information-related assistance and services to the general public. The work requires interpreting and applying laws, regulations, policies, and guidance to provide access to Federal agency records and information, while ensuring protected information is appropriately disclosed. Government Information Specialists make determinations about disclosures, issuance of denials, redactions, access to Federal agency records and use and dissemination of personally identifiable information. Many Government information specialists focus on Freedom of Information Act (FOIA), Privacy Act, or a combination of both.

**Typical work related to FOIA includes:**

- researching, analyzing, and evaluating data for response to information requests;
- assembling and reviewing proposed FOIA release packages;
- keeping abreast of recent developments in the field of disclosure, including recent court and department decisions, current legislative resolutions or problems encountered within the FOIA program;
- reviewing and analyzing appeals from denials of access to records requested under FOIA and recommending final agency decision on release/non-release of records;
- testifying on behalf of the agency with regard to FOIA cases and assisting Government attorneys in the litigation process;
- serving as liaison to external customers and recipients to clarify and resolve issues; or
- developing agency policy and procedures with regard to the administration of FOIA.

(continued)
Typical work related to the Privacy Act includes:
- developing, implementing, and maintaining privacy policies and procedures;
- processing Privacy Act data requests;
- providing guidance and advice on Federal privacy policy and processes;
- evaluating confidential personal records that, if released, would constitute an unwarranted invasion of personal privacy;
- evaluating the impact of the Privacy Act and regulations on the organization’s activities;
- coordinating with internal organizations, such as the agency’s information technology security office;
- representing the agency on issues related to the Privacy Act and other information privacy requirements;
- assessing privacy risks associated with programs, operations, and technology;
- ensuring compliance with agency privacy program requirements;
- planning and conducting educational training sessions on Privacy Act requirements; or
- reviewing and evaluating the privacy program.
Automation, computers, information technology, and their widely varied applications are valuable and practical tools for Government information management work. Employees use computers and other systems in processing, administering, and managing information, as well as for a wide variety of record keeping, correspondence, and tracking operations throughout the Government information management lifecycle. They input, delete, retrieve, manipulate, and correct information in databases or automated/electronic records. They design and produce reports using computer systems. Automation increases the capacity of Government information management specialists to design and control a wide variety of information management research tools; systems, and/or processes.

The information technology tools involved and the skills required to use them generally replace or supplement work previously done manually or by machines. Although computers are used to facilitate work within this series, automation does not change the primary purpose of the work or the paramount knowledge required to perform the work. Proper classification of positions is based on the relevant knowledge and skills required to perform the primary duties of the position.
## Additional Occupational Considerations

Some positions may include work requiring knowledge and skills typically associated with the Government Information Management Series. However, a closer look at the work may reveal classification to this series may not be appropriate. The General Series Determination Guidelines section of this flysheet offers guidance on selecting the most appropriate series.

The following table provides examples of work similar to that performed in the Government Information Management Series, 0306, but not to the extent the paramount knowledge required, the reason for the position’s existence, the mission and/or function of the organization, and the recruitment sources for the best qualified candidates warrant classification to this series. For further guidance, refer to OPM’s publication The Classifier’s Handbook.

</tbody>
</table>
The Office of Management and Budget requires that all Federal agencies that collect occupational data use the Standard Occupational Classification (SOC) system for statistical data reporting purposes. The Bureau of Labor Statistics uses SOC codes for the National Compensation Survey and other statistical reporting. OPM and other Federal agencies maintain a “crosswalk” between OPM authorized occupational series and the SOC codes to serve this need. This requirement and these SOC codes have no effect on the administration of any Federal human resources management system. The information in this table is for information only and has no direct impact on classifying positions covered by this series. The SOC codes shown here generally apply only to non-supervisory positions in this occupation. As changes occur to the SOC codes, OPM will update this table. More information about SOC is available at [http://stats.bls.gov/soc](http://stats.bls.gov/soc).

GRADING INSTRUCTIONS

This flysheet does not provide occupation-specific grading criteria.

Use the Administrative Analysis Grade Evaluation Guide grading criteria to evaluate non-supervisory positions at the GS-09 or above.

Due to the diversity of assignments in this occupation, users should not seek a one-to-one correspondence between the duties of a particular position and the factor level descriptions and work illustrations in the guide. Instead, users should strive to match the intent of the various factor levels and seek to locate concepts and examples which are comparable.

Other standards may be used in conjunction with this flysheet or independently as appropriate, depending upon the nature of the work.

Evaluate leader positions using the General Schedule Leader Grade Evaluation Guide.

Evaluate supervisory positions using the criteria in the General Schedule Supervisory Guide.
