OVERVIEW

General

Payroll data standards revisions occur throughout the year to reflect changes in human resource programs. We issue these revisions as changes in the Unincorporated Changes section of this manual's Appendix. Readers should always check the Unincorporated Changes section of the Appendix for any revisions that have occurred since the last Update.

We issue complete revisions of this manual as Updates. When we issue an Update, we incorporate all the changes effective as of the date of the Update. This date is shown at the bottom of each page. We list all the revisions in the Incorporated Changes section in this manual's Appendix. Thus, any change in the body of the manual from one Update to the next is listed in the Incorporated Changes section.

Authority

The Office of Personnel Management's authority to prescribe Federal civilian training data standards is based on:

- Title 5, Section 2951 of the U.S. Code (5 U.S.C. 2951).
- Title 5, U.S.C. Section 1103 gives OPM authority to recommend policies to pay, and Section 1104 (a)(1) authorizes the President to “delegate, in whole or in part, authority for personnel management functions to the Director of the Office of personnel Management.”

Objectives

The objectives of the data standards program are to facilitate use of Federal civilian training data and to avoid unnecessary duplication and incompatibility in the collection, processing, and dissemination of such data.
Responsibilities

1. Office of Personnel Management responsibilities. The Office of Personnel Management is responsible for managing the Federal civilian personnel data standards program and for overseeing the development, implementation, and maintenance of Federal civilian personnel data standards.

2. Agency responsibilities. The agencies are responsible for assisting the Office of Personnel Management in the development, implementation, and maintenance of Federal civilian personnel data standards and for using the data standards, as appropriate, on official personnel documents and Enterprise Human Resources Integration (EHRI) submissions.

Development, Implementation, and Maintenance

1. Development. Data element standards are developed to satisfy information needs. Such development may be initiated by the Office of Personnel Management or requested by an agency by writing to: Manager, Records Management, Office of the Chief Information Officer (OCIO), Office of Personnel Management, 1900 E Street NW, Washington, DC 20415-6000. A requirements analysis is performed to determine how best to satisfy the information needs, whether the information benefits justify the data collection and processing costs, and whether new or revised data element standards are required.

Draft standards are developed in cooperation with the primary user of the information. The draft standards are then concurrently reviewed by the Office of Personnel Management program offices. Any modifications to the draft standards are coordinated with the primary user to ensure that the modified draft standards satisfy user information needs.

2. Implementation. Implementation of data element standards to satisfy Office of Personnel Management reporting requirements is done in consultation with the agencies to minimize implementation costs.

3. Maintenance. To assure proper maintenance, each data element standard specifies the organization that is responsible for authorizing revisions to the data element and ensuring that the data element is kept current.
OVERVIEW

The Office of the Chief Information Officer (OCIO) coordinates maintenance activities on behalf of the responsible organizations. To request information about a data element standard or to notify the OCIO of changes needed to keep a code set current (such as AGENCY/SUBELEMENT), contact the OCIO at (202) 606-1162 or email address larry.wells@opm.gov.
