

Appendix V

Listing of Agency Special Wage Schedules and Rates Documented Under the Federal Wage System

- a. **Coverage under Federal Wage System.** This appendix provides information relating to the identification of each category of special schedules or rates, a brief description of the basis for the rates, a statement concerning the evaluation plan and identification of the lead agency and the using agencies. The purpose of this documentation is to identify and list all the special schedules and rates as pay schedules within the scope of the Federal Wage System. The Office of Personnel Management will undertake a program which will involve an indepth study to determine the most appropriate pay treatment for each of these special schedule categories and to assure that equitable pay treatment is afforded all special schedule employees of all agencies who are performing similar work in the same wage area.
- b. **Special wage schedules.**
 - (1) Current agency practices with respect to these special wage schedules or rates are to be continued except those practices which were required to be modified as a result of Public Law 92-392. For example, the law provides that special schedules may have single or multiple rates or steps according to prevailing practices in the industry on which the schedule is based. Current agency step rate practice will be continued pending the indepth studies of these special schedules.
 - (2) Provisions relating to night shift differential, pay retention, and labor organization participation in wage surveys are applicable to employees covered under the special wage schedules.
 - (3) This appendix does not include special schedules or rates established by OPM under the Federal Wage System. Description of special practices under these schedules are in subchapter S11.

F. CONSTRUCTION SCHEDULES

Construction Schedules

Construction type schedules generally are established as needed by Federal agencies for new construction types of projects. Rates for such schedules are generally job rates based on prevailing rates for comparable construction work in the local area as determined under the Davis-Bacon Act of 1931. In the absence of the Davis-Bacon rates for a locality, rates for a construction schedule may be based on prevailing construction industry rates for comparable jobs as determined by a survey in the local area.

Agencies currently establishing and using construction-type wage schedules are as follows:

- Department of Agriculture.
- Department of Defense.
- Department of Health and Human Services.
- Department of the Interior.
- Department of Veterans Affairs.

Purchase Hire Schedules

Basis for Schedule: A single job rate is established normally using the hiring rate for the grade of a similar job on the regular wage schedule. When local conditions warrant, the activity commander is authorized to pay a higher rate, i.e., any higher step rate on the Federal Wage System schedule for the appropriate grade or a rate above the schedule not to exceed the authorized force account rate for similar work.

Evaluation Plan: The Federal Wage System grading structure is applied to determine the appropriate wage rate level to use as a base.

Agencies currently establishing and using purchase hire schedules are as follows:

- Department of the Army.
- Department of the Air Force.
