How to Conduct Screenings
2014 Prevention Campaign Fact Sheet

Vision of the National Prevention Strategy: Working together to improve the health and quality of life for individuals, families, and communities by moving the nation from a focus on sickness and disease to one based on prevention and wellness.

Common barriers that often prevent people from getting routine health screenings, such as inconvenience, cost, and lack of understanding, can be eliminated through workplace screening initiatives. There are two types of health screenings typically promoted by agencies:

1. **Laboratory/blood tests** to detect health abnormalities, such as biometric screenings, offered through the Federal Employee Health Benefits (FEHB) Program or at an onsite health clinic; and
2. **Lifestyle questionnaires**, such as a health risk appraisal (HRA), to identify risk factors.

Below are ways Federal agencies can offer screenings to improve the effectiveness of their worksite health and wellness programs.

**FEHB PREVENTIVE HEALTHCARE**
All FEHB plans cover HRAs, biometric testing, and immunizations plus over 70 preventive services with no out of pocket costs. If this approach is taken, agencies get employees screened at no extra cost, employees learn how to get similar services for their family members, and results get back to the employee’s physician for any follow up that is needed. Many plans are even offering incentives for completion of HRAs and/or biometric testing. Agency worksite health & wellness coordinators should work with their agency benefits officers to promote these FEHB services and encourage employees to understand their specific plans, because there may be limits to networks and frequency. Preventive services that have a rating of A or B from the U.S. Preventive Services Task Force are covered by FEHB plans. You can see the complete list here: [http://www.uspreventiveservicestaskforce.org/uspstf/uspsabrecs.htm](http://www.uspreventiveservicestaskforce.org/uspstf/uspsabrecs.htm).

**ONSITE HEALTH CLINICS**
Onsite health clinics can provide convenient access to high quality preventive healthcare. A variety of services can be offered at agencies, such as biometric screenings, primary care, health coaching, disease management, occupational health, and more! These services are intended to reduce agency costs, improve employee health, increase productivity, and reduce long-term risk.

**HRAS & OTHER LIFESTYLE SURVEYS**
Typically, HRAs and other lifestyle surveys are offered annually to all employees to track progress. Some delivery modes used are online via a computer at home or work, kiosks at work, paper-and-pencil, personal interviews, and phone interviews. When choosing a delivery mode, agencies should consider which method will provide access to the most employees. An HRA can be the single point of entry to an agency worksite health promotion program and serve as a participation tracking tool. Feedback should be given to individual employees immediately upon completion of an HRA or during an individual
coaching session. Some HRAs are capable of providing aggregate data without identifying individuals; this information can be useful to agency coordinators when planning future employee health program options.

**HEALTH FAIRS & SPECIAL EVENTS**

Workplace health fairs are a great way to educate employees about health services available to them and the value of participating in preventive healthcare, such as screenings. Health fairs can include exhibitors from FEHB providers and various offices within your agency that have an interest in employee health (e.g., safety department, food service, Flexible Spending Accounts, Employee Assistance Programs, etc.). Agencies may also leverage external resources, including community organizations and universities. The best health fairs have a variety of activities, such as, but not limited to:

- Screenings
- Educational Information
- Chair Massages
- Yoga
- Healthy Cooking Demos
- First Aid
- Ergonomics

**RESOURCES & GUIDANCE FOR WORKSITE HEALTH & WELLNESS COORDINATORS**

**U.S. Office of Personnel Management’s Health & Wellness Federal Tools & Resources Page**
From Governmentwide guidelines to sample resources and information on Federal agencies that play a key role in worksite health & wellness, many tools and resources are available on this website to help understand the basics of worksite health & wellness, explore issues in greater detail, and implement effective programs.

**CDC Workplace Health Promotion Employee Healthy Surveys**
This site provides suggestions for the design, delivery, and assessment of employee health surveys.

**CDC Healthier Worksite Initiative Health Risk Appraisals**

CDC Healthier Worksite Initiative has developed guidance and considerations for the use of Health Risk Appraisals in the workplace. This site includes considerations for use, the purpose of HRAs, identifying what your workplace wants from an HRA, important implementation aspects (ethics, technical features, mode of administration, use of incentives and more), and a checklist for planning HRA implementation.

**The National Business Group on Health & CDC’s Health Risk Appraisals at the Worksite Guide**

This guide provides information to help employers make informed decisions about if, why, when, and how to use HRAs for their workforce. It includes an overview of HRAs, an HRA features prioritization checklist, and an HRA comparison checklist.
