

Benefits Administration Letter

Number 13 - 102

Date: June 4, 2013

Subject: Federal Employees Retirement System-Revised Annuity Employees (RAE)-Additional Guidance

Purpose: The purpose of this Benefits Administration Letter (BAL) is to provide **additional guidance** concerning employees and Members of Congress who will be covered under the Federal Employees Retirement System (FERS) as Revised Annuity Employees (RAE), FERS-RAE. This guidance only applies to automatic FERS coverage determinations. Employees who are subject to CSRS, CSRS-Offset, or FICA-only coverage and who have an opportunity to elect to transfer to FERS will be subject to FERS, not FERS-RAE, if they elect to transfer to FERS.

Background: Public Law 112-96, Section 5001, the "Middle Class Tax Relief and Job Creation Act of 2012," made two significant changes to the Federal Employees' Retirement System (FERS). First beginning in 2013, new employees (as designated in the statute) must pay significantly higher employee contributions, an increase of 2.3 percent of salary. Second, new Members of Congress and Congressional employees, in addition to paying higher retirement contributions, will accrue retirement benefits at the same rate as regular employees. Initial guidance was provided in BAL 12-104 dated October 3, 2012.

Review of Coverage Determination:

FERS-RAE coverage generally applies to any individual who receives an appointment not excluded from FERS coverage on or after January 1, 2013, and who would normally be placed in FERS. There are three exceptions to this general rule, however, and the date December 31, 2012, is a key date for each of those exceptions. An individual will be excluded from FERS-RAE coverage if any of these exceptions apply:

1. the individual on December 31, 2012, was covered under FERS;

OR

2. the individual on December 31, 2012, was performing civilian service which is creditable or potentially creditable service under FERS (for example the individual may have been covered under another retirement system from which

service credit may be transferred to FERS, such as CSRS, CSRS-Offset, Foreign Service, Federal Reserve, or CIARDS)

OR

3. the individual on December 31, 2012, was not covered under FERS and was not performing civilian service which is creditable or potentially creditable service under FERS, **but** as of December 31, 2012 had performed at least **five years of civilian service creditable or potentially creditable** under FERS, including service subject to CSRS or CSRS-Offset.

FERS Military Deposits:

The general rule for FERS military deposits is that the deposit equals 3% of military basic pay. That 3% deposit figure was not changed by the FERS-RAE legislation. The provisions for the military deposit can be found in 5 U.S.C 8422(e).

For individuals who perform military service that interrupts civilian service, and then who qualify for reinstatement into the civilian position under USERRA, the deposit for the military service equals the lesser of:

- 3% of the military basic pay, or
- The amount of civilian deductions that would have been withheld from the employee's civilian basic pay had the employee not performed the period of military service

The calculation of the deposit based on the civilian basic pay for FERS-RAE employees will be based on the higher deduction percentage that applies to the FERS-RAE employee. The agency must do the calculation to determine which is the lesser of the two for the military deposit.

Member of Capitol Police:

BAL 12-104 incorrectly included members of Capitol Police (sworn) with Law Enforcement Officers and fire-fighters for the purposes of FERS and FERS-RAE normal costs. The current normal costs for FERS and FERS-RAE members of the Capitol Police will remain 18%. The employee FERS-RAE contribution rate will be 3.6% and the agency contribution rate will be 14.4%.

Retirement Plan Codes:

In support of Public Law 112-96, OPM will begin collecting data on new hire employees' that are on boarded on/after January 1, 2013, under the FERS Revised Annuity Employee (RAE). The new two digit code will be used specifically for employees that fall into the new FERS-RAE retirement category. Agencies submitting data to OPM using the legacy single digit code (for example "K"); will submit data into the new formatted two-digit field, ensuring all entries are left justified. The updated Retirement Plan Codes and definitions are attached.

FERS-RAE Reporting:

OPM Financial Services has been providing payroll and financial guidance through Financial Pay listserv, FINPAY@LISTSERV.OPM.GOV. They have advised that all payroll providers must be able to capture, segregate, and apply the applicable rates for FERS-RAE employees and their associated payroll data, starting on January 1st, 2013 and going forward.

They are working with Treasury FMS regarding necessary changes to the Retirement and Insurance Transfer System (RITS) Bulk File as required by the implementation of FERS RAE, to comply with the requirements of P.L. 112-96, Sec. 5001.

Attached is the RITS Incoming Bulk File Layout dated January 15, 2013, version 0.2. The FERS RAE changes to be implemented may be found at Columns 128 – 320 on pages 10 – 11 of the Bulk File Layout.

Treasury FMS has advised that it plans to have several of the large RITS users test their bulk file submissions in their test environment, prior to the release, sometime in September, 2013. The specifics of Treasury's testing efforts have not yet been identified, but Treasury will keep OPM updated as to its testing plans as soon as they have been defined.

OPM will provide additional updates as further details become available, including Bulk File testing schedules.

Treasury FMS advised the planned release date for the FERS RAE enhancement is November, 2013. IPAC/RITS will be available to receive the new FERS RAE data from the inputting Agencies and display the results to OPM as approved.

If you have any questions and/or concerns, please call the IPAC support line at 866-809-5218 option 2, then option 2 again.

Application Overview

The Retirement and Insurance Transfer System (RITS) application was jointly developed by the Office of Personnel Management (OPM) and the Financial Management Service (FMS) to automate the transfer of Federal employee's health benefit, retirement and life insurance program information and payments. FMS partnered with the Federal Reserve Bank of Richmond to re-engineer the RITS application. The improved RITS application automates the submission of the "Report of Withholdings and Contributions for Health Benefits, Life Insurance and Retirement" (SF2812) and the "Report of Withholdings and Contributions for Health Benefits by Enrollment Code" (SF2812A) to OPM.

RITS accumulates information from Federal Program Agencies (FPAs) about the total amount of withholdings and related agency contributions for retirement and insurance. Each user agency defines one or more payrolls, associated pay cycles and payroll start dates. From these parameters RITS creates and maintains an automated payroll/report schedule. This schedule gives the FPA and OPM the ability to calculate and track obligation due dates and payment timeliness. Agency submission performance is monitored on a regular basis by OPM. In the event that a payment is delinquent, OPM has the ability to create an estimated report on the agency's behalf. Estimated reports are based on the most recent payment made by the agency that best reflects the probable amount of the current obligation. Once an agency generates a RITS transaction for a delinquent obligation, the RITS application automatically reverses any estimated payment processed by the OPM administrator.

On a daily basis, the OPM administrator initiates a process to collect all RITS transactions due and submitted for payment. This process extracts all health benefit, retirement and life insurance program information for transmission to OPM for further processing. At the same time, it generates formatted transactions to be submitted to IPAC to transfer funds to satisfy the obligations incurred by each report.

Bulk File Format Conventions

The following conventions were used in the bulk file formats for this document.

- All required fields are indicated by a *
- Values in the column "Type"
 - A – Alphanumeric
 - N – Numeric
- Alphanumeric fields are left justified and padded with spaces.
- Numeric fields are right justified and padded with zeros.
- Numeric fields with an implied decimal are described in the "Length" column as two numbers separated by a decimal. The first number represents the total length of the field. The second number represents the implied decimal places within the field.
 - For example, a numeric field defined as 11.2 has a total of 11 bytes with 2 implied decimal places.
- Standard or valid default value(s) of fields are denoted by quotes ("xxxxxx") around the value.

NOTE: The last digit of the amount field is "signed" with an over-punch to indicate a positive or negative dollar amount.

SF 2812 Data

Purpose: The data elements reflect a line-by-line listing of the data elements for the developmental Retirement and Insurance Transfer System (RITS). Each 2812 and 2812A are viewed as one transaction containing multiple record types: the SF2812 Data will require three records, the number of records necessary for the SF 2812A Data will be determined by the number of Health Benefit codes reported, and one record will be required for the 2812A Total Record Data.
